E 14 - B
April 19 call

EMS Team,

Thank you for your response to my 911 call earlier this year when my Mother suffered a massive stroke in our back yard. Although I've written several thank you letters to you in the months that have passed, they all fell short and none were sent. I apologize for the time that has passed.

The team that arrived at our home the evening of April 19th was professional, and courteous and quickly went to work on Mom. Although there was nothing that could be done to bring her back to us, I am so grateful that all of you tried your best. I remember your kindness, concern and respect shown to Mom and our family. And lately I've thought about just how difficult your job must be. Not to be able to save everyone and having to tell their families of their loss.

Please don't let the time that has passed diminish the heartfelt gratitude that we feel; know that we appreciate everything all of you did for our Mom and for us. Just to know that you will be there when we need you is a great comfort. Thank you and may God bless you and your families

With Kindest Regards,
Cheri Marshall and
the family of
Mary "Mickey" Fowler
