

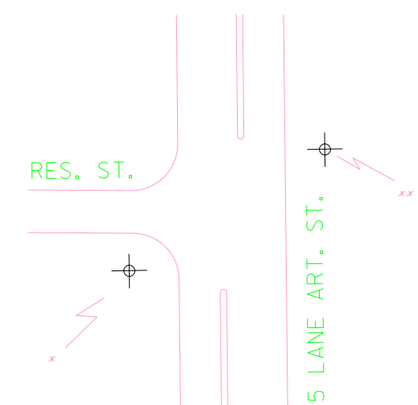
*LOCATION OF SIGN TO BE DETERMINED BY CITY
**LOCATION OF SIGN BY CONTRACTOR



All pipes installed in residential area shall be painted gloss black and shall be 10' or 12' (depending on location) in length by 2" in diameter.

All posts/pipes shall be installed at 30" depth with support flange below ground level. Pipes can not be driven in from top as this will damage the metal, and street name stem may not go on. Hole must be augered in ground and post may be driven in by the flange. All locations where posts are installed are to be cleared by one-call before installation.

All locations where posts are to be installed shall be no less than 3' from back of curb, unless otherwise cleared by City.

Numbered street (N.3rd St.) shall be at the very top of the assembly if the width of both blades are the same. The widest blade (9") goes on top, if the blades are different size (6" and 9").
