Open House

Tierra Park's Water Quality Improvements

You're invited to an open house on the proposed design of water quality improvements and a water quality feature in Tierra Park.

Tuesday, January 27 from 5:30 - 7 p.m.
Hill Elementary School, 5230 Tipperary Trail

Design work is progressing for the project, which will include removal of the failing concrete liner and addressing water quality issues. The project will realign the current channel to flow through the park and add a new water quality feature, improving the quality of water entering Beal Slough. Construction is expected to begin this year.

At the open house, representatives of the City and its project consultants will be available to discuss the proposed design and answer questions.

If you have questions or are unable to attend, please contact either Travis Figard with Olsson Associates at 458-5917 or Holly Lionberger with the City of Lincoln at 441-8400.
