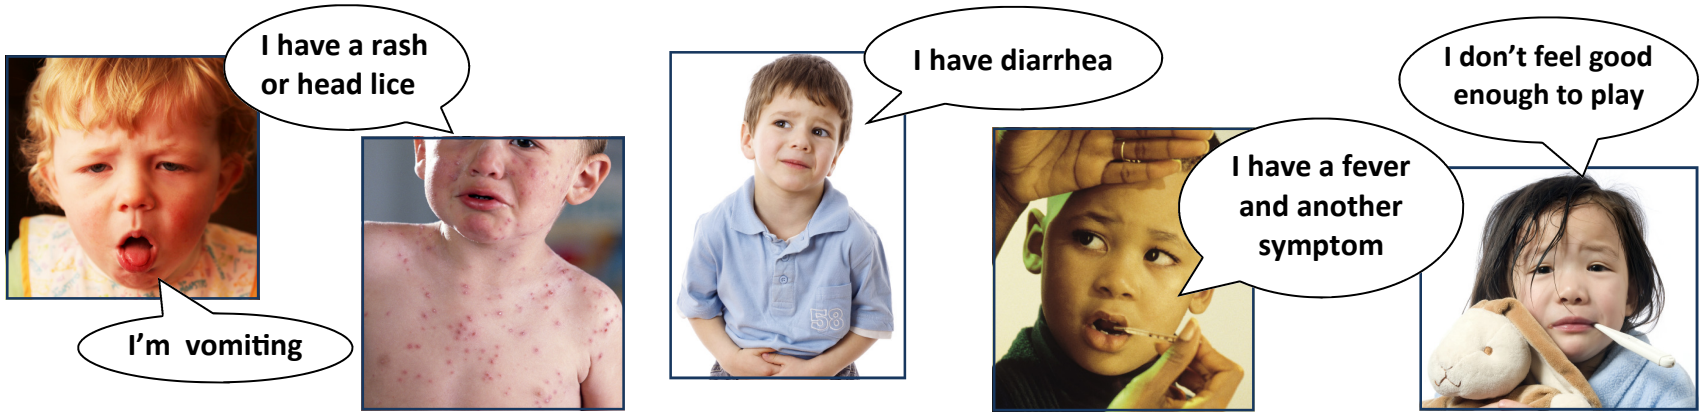
Please Keep Your Child Home if...



Vomiting	2 or more times in the past 24 hours.
Rash	• With fever or behavior change, until a physician has determined the illness is not contagious. • Chickenpox (varicella) until all lesions have dried or crusted. • Impetigo, until 24 hours after treatment has been started. • Mouth sores with drooling. • Head lice or ringworm until after the first treatment.
Diarrhea	Diapered children whose stool is not contained in the diaper and toilet-trained children with diarrhea causing "accidents" require exclusion from care. In addition, children with diarrhea should be excluded if the stool frequency exceeds 2 or more stools above normal in a day for that child.
Fever	Temperature above 100º F axillary [armpit] or 101º F orally ***and*** behavior change or other illness symptoms (e.g., sore throat, rash, vomiting, diarrhea).
Not Feeling Well	Any child who requires more care than can be given by staff in a group setting or a child who is unable to participate in regular daily activities.

For more information on illness exclusion, check with the director or your facility's Health Policy.
