COMMENTARY TO ACCOMPANY BONDS

A. GENERAL INFORMATION

There are two types of bonds that are required by statutes for public work in many jurisdictions and are widely used for other projects as well.

Performance Bond
Payment Bond

The Performance Bond is an instrument that is used to assure the availability of funds to complete the project.

The Payment Bond is an instrument that is used to assure the availability of sufficient funds to pay for labor, materials and equipment used in the project. For public work the Payment Bond provides rights of recovery for workers and suppliers similar to their rights under the mechanics lien laws applying to private work.

The objective underlying the re-writing of bond forms was to make them more understandable to provide guidance to users. The intention was to define the rights and responsibilities of the parties, without changing the traditional rights and responsibilities that have been decided by the courts. The new bond forms provide helpful guidance regarding time periods for various notices and actions and clarify the extent of available remedies.

The concept of pre-default meeting has been incorporated into the Performance Bond. All of the participants favored early and informal resolution of the problems that may precipitate a default, but some Surety companies were reluctant to participate in pre-default settings absent specific authorization in the bond form.

The responsibilities of the Owner and the options available to the Surety when a default occurs are set forth in the Performance Bond. Procedures for making a claim under the Payment Bond are set forth in the form.

EJCDC recommends the use of two separate bonds rather than a combined form. Normally the amount of each bond is 100 percent of the contract amount. The bonds have different purposes and are separate and distinct obligations of the Surety. The Surety Association reports that the usual practice is to charge a single premium for both bonds and there is no reduction in premium for using a combined form or for issuing one bond without the other.

B. COMPLETING THE FORMS

Bonds have important legal consequences; consultation with an attorney and a bond specialist is encouraged with respect to federal, state and local laws applicable to bonds and with respect to completing or modifying the bond forms.

Both bond forms have a similar format and the information to be filled in is ordinarily the same on both bonds. If modification is necessary, the modifications may be different.

The bond forms are prepared for execution by the Contractor and the Surety. Evidence of authority to bind the Surety is usually provided in the form of a power of attorney designating the agent who is authorized to sign on behalf of the Surety. The power of attorney should be filed with the signed bonds.

Each bond must be executed separately since they cover separate and distinct obligations.

Preferably the bond date should be the same date as the contract, but in no case should the bond date precede the date of the contract.

To accompany the Performance Bond (EJCDC No.1910-28A) and the Payment Bond (EJCDC No. 1910-28B)

The City/County Purchasing Division has established "unit price" bids from our local repair and service contractors in an effort to streamline the process necessary to obtain services from various trades to perform small emergency and routine maintenance and repair for our facilities. During the course of the contract period, any Owners Department / Division / Agency may utilize the established unit price contract for maintenance, repair and small remodeling projects under \$10,000. Unit Price Service Contracts shall not include contracts involving: a) any street, alley bridge or highway, or b) the new construction, furnishing, erection or installation of any building or structure.
 - 1.2 **Labor and Materials:** (time and materials) The contractor will be paid for labor and materials instead of charging a fixed price or percentage of costs.
