

COMMUNITY ORGANIZATION

CONCEPTS AND STRATEGIES:

- It is extremely important for the College View Neighborhood to organize in order to be able to accomplish many different potential projects.
- Formulation of Neighborhood Association and/or Business Association is the first step.
- Urban Development Department information, guidance, and potential programs can be very helpful.
- Streetscaping efforts and beautification amenities such as planters, awnings, lighting, signs, trees, special paving, design schemes, benches, trash receptacles, become possible with neighborhood organization efforts and funding.
- Business Improvement District (BID) for maintenance purposes is a possibility.
- Focus Area designation through Urban Development Department is only possible when a neighborhood association exists.
- Many local examples of successful associations and projects.
- The redevelopment process needs organized community involvement.
