START Project Officer  
U.S. Environmental Protection Agency, Region 7  
901 North 5th Street  
Kansas City, Kansas 66101

**Subject: Phase I Targeted Brownfields Assessment  
Jaylynn LLC Property, Lincoln, Nebraska  
EPA Region 7, Mini-START, Contract No. EP-S7-09-01, Task Order No. 0013  
Task Monitor: Ron King, Site Assessment Team Leader**

Dear Mr. Crossland:

Seagull Environmental Technologies Inc. (Seagull) is submitting the enclosed Phase I Targeted Brownfields Assessment (TBA) report for the Jaylynn LLC Property in Lincoln, Nebraska. The goal of the Phase I TBA is to identify recognized environmental conditions associated with the site. This Phase I TBA was completed in accordance with industry standard practice for Phase I Environmental Site Assessments.

If you have any questions or comments, please contact the project manager at (913) 220-5887.

Sincerely,

Gregory R. Dillon  
Mini-START Environmental Scientist

Hieu Q. Vu, PE  
Mini-START Program Manager

## EXECUTIVE SUMMARY

Seagull Environmental Technologies Inc. (Seagull) Region 7 Mini-Superfund Technical Assessment and Response Team (Mini-START) was tasked by the U.S. Environmental Protection Agency (EPA) Region 7 Superfund Division to conduct a Phase I Targeted Brownfields Assessment (TBA) of the Jaylynn LLC property, which is an approximate 2.1-acre property located in Lincoln, Nebraska. The City of Lincoln applied for a Brownfields grant from EPA Region 7 for assessment of the site, which has been targeted for redevelopment. Mini-START conducted this Phase I TBA in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, American Society for Testing and Materials designation E 1527-05, and otherwise in compliance with EPA's "All Appropriate Inquiries" Rule ("AAIRule") (40 *Code of Federal Regulations* [CFR] Part 312). The purpose of the Phase I TBA is to identify recognized environmental conditions (REC) in association with the site, and to identify the nature of contamination and the risks posed by the contamination, if present.

The site is located at 660 N Street, on the western edge of downtown Lincoln, Lancaster County, Nebraska. The subject property is owned by Jaylynn LLC and is occupied as a lumber yard by Watson-Brickson Lumber. Historical records indicate the site has been operated as a lumber yard dating back to 1903. The site was occupied by a Former Manufactured Gas Plant (FMGP) in the late 1800s. The site contains one office building and three storage buildings. A mix of industrial, commercial, and retail properties are located in the surrounding area. Railroad tracks are located adjacent to the site to the east. West of the site is a metal scrap yard (Alter Scrap Yard). North and west of the site beyond Alter a Burlington Northern Santa Fe (BNSF) railroad yard and corridor. South of the subject property are commercial and industrial businesses.

The following significant findings were identified from review of historic records, environmental database review, site reconnaissance, or interviews.

- The subject property was identified on historical Sanborn® map as the "Lincoln Gas Works," which was a FMGP. FMGP operations commonly produced significant amounts of waste products, many of which contained hazardous materials. Historical use of the subject property as a FMGP poses a REC to the site.
- Site reconnaissance findings and a review of historical information determined that commercial and industrial properties are located adjacent to the site. In particular, a railroad yard is currently located adjacent to the subject property to the north. The railroad yard has been in operation since the late 1800s. In addition, a metal scrap yard is located adjacent to the subject property to the west. This property has been operated as a scrap yard since 1949. These facilities could be potential sources of contamination. The likelihood of release of hazardous materials or wastes from these facilities pose RECs to the subject property.

- Phase I and Phase II Environmental Site Assessments (ESA) were previously conducted by HWS Consulting Group (HWS) in August 2007 and May 2008, respectively. Laboratory analysis of soil samples collected during the Phase II ESA revealed concentrations of contaminants commonly associated with FMGP sites (volatile organic compounds [VOC] and semi-volatile organic compounds [SVOC]) that exceeded health-based benchmarks.
- Two sites located upgradient of the subject property have been identified as HRECs. Both of those sites are LUST sites that are no longer active (no further action required).

Based on the identification of those RECs, Seagull provides the following recommendations:

- Seagull recommends a Phase II TBA of the site. Soil and groundwater samples should be collected and analyzed for contaminants commonly associated with FMGP sites, as well as historical industrial contaminants, including VOCs, SVOCs, total petroleum hydrocarbons, and metals. Phase II TBA sampling activities should include both soil and groundwater sampling to characterize the vertical and horizontal extent of contamination on the subject property.

## 1.0 INTRODUCTION

The Seagull Environmental Technologies Inc. (Seagull) Region 7 Mini-Superfund Technical Assessment and Response Team (Mini-START) was tasked by the U.S. Environmental Protection Agency (EPA) Region 7 Superfund Division to conduct a Phase I Targeted Brownfields Assessment (TBA) of the Jaylynn LLC Property (site), which is an approximate 2.1-acre commercial property located west of downtown Lincoln, Nebraska. The property is owned by Jaylynn LLC. The Jaylynn LLC site will hereafter be referred to as the “subject property” or “site”. The site address is 660 N Street in Lincoln, Nebraska. The City applied for a Brownfields grant from EPA Region 7 for assessment of the site, which has been targeted for redevelopment.

Mini-START conducted this Phase I TBA of the property in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, American Society for Testing and Materials (ASTM) designation E 1527-05, and otherwise in compliance with EPA’s “All Appropriate Inquiries” Rule (AAI Rule) (40 Code of Federal Regulations [CFR] Part 312). For the purpose of this Phase I TBA, the *users* are defined as the EPA and the City of Lincoln (Section 3.2.93, ASTM 2005). EPA tasked Mini-START to conduct a Phase I TBA on the site to identify recognized environmental conditions (REC) associated with the property and identify the nature of contamination and the risks posed by the contamination, if present.

### 1.1 PURPOSE

The goal of this Phase I TBA is to identify RECs at the site. RECs are the presence or likely presence of any hazardous substances or petroleum products on a site under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the site or into the ground, groundwater, or surface water of the site. The term includes hazardous substances or petroleum products, even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies (Section 1.1.1 E 1527-05, ASTM 2005). Historical Recognized Environmental Conditions (HREC) are environmental conditions that in the past would have been considered RECs, but that may or may not be considered RECs currently (Section 3.2.39 E 1527-05, ASTM 2005).

This Phase I TBA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability: that is, the practices that

constitute ~~all~~ appropriate inquiry into the previous ownership and uses of the site consistent with good customary practice,” as defined in 42 U.S. Code Section 9601 (35)(B).

## **1.2 SCOPE OF WORK**

EPA developed a Statement of Work for Phase I TBA activities to be performed at the site. The scope of work (SOW) (see Appendix A), based on ASTM designation E 1527-05, was to identify RECs at the site. Phase I Environmental Site Assessments (ESA) (referred to as a Phase I TBA in this report) typically are conducted in a four-phase process, including: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the site, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report. Section 11.0 lists sources referenced during this investigation.

Any items listed in the ASTM standard that the report does not specifically identify as present can be assumed not present within the site or within such distance to the site as to be of potential concern to the site. Any item mentioned but not specifically identified as a REC can be assumed not a REC. A Brownfields Property Profile form that has been created for the site is included in Appendix A.

## **1.3 SIGNIFICANT ASSUMPTIONS**

The following are beyond the scope of this evaluation: sampling and analysis for asbestos, lead-based paint, radon, and lead in drinking water (related to plumbing systems); evaluations of air quality, regulatory compliance, industrial hygiene, and noise impacts; and identification of geological or geotechnical hazards.

## **1.4 DEVIATIONS**

No deviations were noted from ASTM E 1527-05 or the EPA SOW for this Phase I TBA. Section 7.1 in this report provides a data gap analysis for this Phase I TBA.

## **1.5 LIMITATIONS AND EXCEPTIONS**

This report was based partially on information supplied to Seagull from outside sources and on other information available in the public domain. The conclusions and opinions reported herein are based on the information Mini-START obtained in compiling the report. This information is on file at Seagull's office in Overland Park, Kansas. Seagull makes no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services.

Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. Seagull does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or the fulfillment of the client's obligations under local, state, or federal laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

## **1.6 SPECIAL TERMS AND CONDITIONS**

There were no special terms or conditions for the Phase I TBA.

## **1.7 STATEMENT OF USER RELIANCE**

Seagull is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I TBA. For this Phase I TBA, Seagull may rely on information provided unless actual knowledge is possessed that certain information is incorrect based on information obtained during the Phase I TBA or otherwise actually known by the person preparing this report.

## **2.0 SITE DESCRIPTION**

This section provides a brief description of the site and the physical setting based on information obtained from EPA Region 7, the City of Lincoln, and a records review. Observations during the site reconnaissance regarding current land use of the site and adjoining facilities are described in Section 4.0.

### **2.1 SITE LOCATION AND LEGAL DESCRIPTION**

The site is located at 660 N Street, on the western edge of downtown Lincoln, Lancaster County, Nebraska. The site is bounded to the north by a Burlington Northern Santa Fe (BNSF) railroad yard, to the east by South 7<sup>th</sup> Street, to the south by N Street, and to the west by South 6<sup>th</sup> Street.

The site is included on the Lincoln, Nebraska, U.S. Geological Survey (USGS) 7.5 minute topographic quadrangle map (USGS 1980) (see Appendix B, Figure 1). The site is located in the northwest quarter of Section 26, Township 10 North, and Range 6 East. The coordinates for the approximate center of the site are 40.8131 degrees north latitude and 96.7124 degrees west longitude.

The site is comprised of one parcel, which is listed as 10-26-105-003-000. Appendix C contains property information from the Lancaster County Assessor's Office.

## **2.2 SITE VICINITY GENERAL CHARACTERISTICS**

The subject property is a lumber yard that is located west of the downtown business district of the City of Lincoln. The site contains one office building and three storage buildings. A mix of industrial, commercial, and retail properties are located in the surrounding area.

## **2.3 CURRENT AND PAST USES OF THE SITE**

The subject property is owned by Jaylynn LLC. The site (and site buildings) are currently occupied by Watson-Brickson Lumber. Historical records indicate the site has been operated as a lumber yard dating back to 1903 (see Appendix D). The site was occupied by a Former Manufactured Gas Plant (FMGP) in the late 1800s.

## **2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE**

The site includes an office building and three storage structures. The site is accessed from N Street by a gravel driveway space. The office building is approximately 1,000 square feet. The other buildings are primarily for lumber storage and carpentry shops. The subject property is connected to the City's water and sewer supplies (City of Lincoln). Electricity is provided by Lincoln Electric System, and natural gas is provided by Black Hills Energy.

## **2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES**

The site is bound by the BNSF railroad yard to the north and South 6<sup>th</sup> Street to the west. Beyond 6<sup>th</sup> Street is the Alter Scrap Yard (metal scrap yard) with a BNSF railroad corridor located beyond. Immediately east of the site are BNSF railroad tracks with commercial and industrial facilities located further to the east. South of the site are commercial and industrial facilities (see Appendix B, Figure 2).

Historical records indicate the BNSF railroad yard located north of the subject property has been in operation since the late 1880s. In addition, coal yards were also historically located in the railroad yard. A scrap yard has been located adjacent to the subject property to the west since 1949. Sanborn maps from the late 1800s indicate the adjacent property to the west was used for bulk storage of oil. In general, the site has been surrounded by railroad, industrial, and commercial properties since the late 1800s.

## **2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS**

The following sections describe the environmental setting of the site and surrounding area.

### **2.6.1 Topography**

Based on a recent topographic map, the site is approximately 1,155 feet above mean sea level (msl). The site is on relatively flat urban land. The elevation is slightly higher on the eastern side of the site.

The site is located in Lincoln, Lancaster County, Nebraska, in the Central Lowland province of the Interior Plains physiographic division (Lobeck 1948). Soils at the site belong to the Wymore-Pawnee-Burchard Association. These soils are very deep, nearly level to strongly sloping, moderately well drained to well drained, silty or loamy soils with clayey subsoils on uplands (University of Nebraska-Lincoln [UNL] 2010).

### **2.6.2 Geologic Setting**

The site is underlain by the Cretaceous Dakota Group (Gosselin 1996). The general sequence for this group includes a lower sandstone-dominated Nishnabotna Member and an upper mudstone-dominated Woodbury Member. The thickness of the Dakota Group ranges from 45 to 210 feet in eastern Nebraska to about 394 feet in western Nebraska. The thickness of the Nishnabotna in Nebraska is highly variable and probably less than 210 feet. Although Woodbury strata are dominated by mudstones, shales, and siltstones, very fine to fine-grained, channel-shaped sandstone bodies are also present, ranging in thickness from less than 3 feet up to 75 feet. In east-central Nebraska, the Woodbury Member is not recognizable. The Dakota Group in Nebraska is completely or partially overlain by Upper Cretaceous marine shales or Quaternary deposits consisting of glacial till and loess (Gosselin, Harvey, and Flowerday 2003).

### **2.6.3 Hydrogeology**

The site is located in Groundwater Region 11, which occupies the glacial drift area of southeastern Nebraska. The base of the principal groundwater-bearing units in the northern and western parts (including the Lincoln area) of Groundwater Region 11 is the Dakota Formation (Gosselin 1996).

The primary units from which groundwater is obtained are Pleistocene sand and gravel deposits associated with paleovalleys and along some modern stream valleys; however, they are usually of limited extent. Nearly all major water supplies in this region come from the paleovalleys.

The Dakota Formation serves as a secondary source of groundwater where the primary Pleistocene sources are insufficient to meet water-supply needs (Gosselin 1996). The continuous sandstone bodies of the Nishnabotna Member are the primary water-bearing units in east-central Nebraska (Weeks and Gutentag 1988).

The Dakota Group consists of variable amounts of interbedded sandstone and shale (Gosselin 1996). Because of its geologic variability, the Dakota Group's capacity to yield groundwater can differ over short distances; consequently, well yields can be difficult to predict. The thickness of the saturated groundwater-bearing units is generally less than 300 feet. Depth to the regional water table varies as a function of topographic location. In upland areas, depth to water may be greater than 200 feet, while it may be less than 50 feet in the bottomlands of the principal valleys. Groundwater flow through the Dakota aquifer is generally moving to the northeast; however, locally, the flow systems are hydrologically complex (Gosselin, Harvey, and Flowerday 2003).

Perched water conditions occur in areas underlain by glacial till. Water from precipitation or irrigation moves readily through loess and/or isolated lenses of sand and gravel, but not through glacial till. As a result, water saturates the sediments above the till and a perched water table forms. Many domestic farm and stock wells have been developed in these perched water bodies (Gosselin 1996).

Based on registered wells in Section 22, Township 10 North, Range 6 East, shallow groundwater exists at depths approximately 14.5 feet or less below ground surface (bgs). Overburden thickness was recorded to be 46 to 53 feet bgs at those locations (Nebraska Department of Natural Resources [NDNR] 2010).

#### **2.6.4 Hydrology**

The nearest surface water feature is Salt Creek, located approximately 0.5 mile west of the site. The mean daily discharge at the Salt Creek gauging station at Pioneers Boulevard in Lincoln, Nebraska, was 5.2 cubic feet per second (cfs) in 2003 (USGS 2010). According to the Nebraska Department of Environmental Quality (NDEQ), the designated uses for Salt Creek are recreation, aquatic life, agricultural water supply, and aesthetics (NDEQ 2000).

### **3.0 USER-PROVIDED INFORMATION**

The following section summarizes information provided by EPA Region 7 and the City of Lincoln (the users) with regard to the Phase I TBA. A copy of a user questionnaire completed by the City of Lincoln is included as Appendix E.

#### **3.1 EXISTING INFORMATION AND DRAWINGS**

A site map (that includes the subject property) of the West Haymarket redevelopment area was provided by the City of Lincoln and is included in Appendix E.

### **3.2 SUMMARY OF TITLE INFORMATION**

No title records for the site were provided by the users

### **3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS**

The City of Lincoln is unaware of any information regarding environmental liens or activity and use limitations for the subject property.

### **3.4 SPECIALIZED KNOWLEDGE**

HWS Consulting Group (HWS) conducted Phase I and Phase II ESAs for the subject property in August 2007 and May 2008, respectively. The Phase I ESA identified the presence of the FMGP at the site as a recognized environmental condition (REC) and recommended that a Phase II be completed to determine if contamination was present as a result of the FMGP. The Phase II findings are summarized below:

- Soil and groundwater samples were collected primarily from the center and southwest portion of the site. Laboratory results determined soil and groundwater has been impacted by volatile organic compounds (VOC) and polynuclear aromatic hydrocarbons (PAH). VOCs and PAHs are contaminants commonly associated with FMGPs.
- Ten borings were installed at the site for collection of soil and groundwater samples. Several PAHs, including naphthalene, benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, and benzo(a)pyrene, were detected in both soil and groundwater samples that exceeded their established health-based benchmarks (Nebraska Department of Environmental Quality Remediation Goals and EPA Region 9 Preliminary Remediation Goals). In addition, VOCs commonly associated with FMGP sites were also detected. Detected VOCs included benzene, ethylbenzene, toluene, xylenes, and naphthalene. The highest concentration detected in soil was for naphthalene (in SB-1 from 12 to 13 feet bgs) at 88.9 milligrams per kilogram (mg/kg). The highest concentration detected in groundwater was also for naphthalene (in SB-10 [sampling depth not identified]) at 3,110 micrograms per liter ( $\mu\text{g/L}$ ). It should be noted that arsenic was also detected in shallow soils (1 to 3 feet bgs) at concentrations that exceeded health-based benchmarks.

Based on these findings, HWS concluded that soils and groundwater at the site have been impacted due to historic FMGP operations. The source of arsenic was unknown (HWS 2008).

### **3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION**

The property is owned by Jaylynn LLC and occupied by Watson-Brickson Lumber, which operates a lumber yard at the subject property. The site manager was identified as Mr. Bradley Devall.

### **3.6 REASON FOR PERFORMING PHASE I TBA**

This Phase I TBA was requested by the City of Lincoln to provide an environmental assessment of the site for future redevelopment associated with the West Haymarket area.

## **4.0 SITE RECONNAISSANCE**

A site reconnaissance was conducted on October 22, 2009, by Seagull Team Members Jeff Pritchard and Joel Harvester. Photographic documentation from the site reconnaissance is included in Appendix F.

### **4.1 METHODOLOGY AND LIMITING CONDITIONS**

The site reconnaissance consisted of a visual inspection of the site in accordance with requirements set forth in 40 CFR Part 312, and observations of the perimeter area were noted to assess the presence of environmental concerns. Access was available to all areas of the site.

### **4.2 GENERAL SITE SETTING**

The following sections describe the site's current and past uses.

#### **4.2.1 Site Description**

The site consists of an office building and three storage buildings. The storage buildings are primarily used for lumber storage; however, several carpentry shops are also located within the buildings. The site buildings are constructed of wood. Dirt and gravel access roads are located on the subject property, which is surrounded by a fence.

#### **4.2.2 Current and Past Site Uses**

The site is currently occupied by the Watson-Brickson lumber yard. Historical documents indicate the subject property has been a lumber yard dating back to 1903. During the late 1880s (Sanborn<sup>®</sup> maps indicate from 1884 to 1891), a FMGP was located on the subject property.

## **4.3 SPECIFIC RECONNAISSANCE ITEMS**

The following sections summarize observations during the reconnaissance.

### **4.3.1 Hazardous Substances and Petroleum Products**

No hazardous substances or petroleum products (excluding products [small quantities of paint varnish, aerosols, etc.] being sold in the lumber yard office) were found on the site.

### **4.3.2 Hazardous Waste**

No hazardous waste was found or has been known to have been present on the site.

### **4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal**

No landfills, dumps, evidence of burial activities, or solid waste disposal were observed at the site.

#### **4.3.4 Storage Tanks**

##### **Underground Storage Tanks**

No indications of underground storage tanks (UST) were observed on the site or within the immediate vicinity of the property.

##### **Aboveground Storage Tanks**

No visual evidence of past or present on-site aboveground storage tanks (AST)—including pipes, pumps, or stains—was apparent during the site reconnaissance.

#### **4.3.5 Polychlorinated Biphenyls-containing Equipment**

No transformers or other equipment potentially containing polychlorinated biphenyls (PCB) were observed at the site.

#### **4.3.6 Heating, Ventilation, and Air Conditioning System and Fuel Source**

Heating, ventilation, and air conditioning systems are associated with the lumber yard office.

#### **4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools**

No drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored were observed on the site during the site reconnaissance.

#### **4.3.8 Pits, Ponds, and Lagoons**

No pits, ponds, lagoons, or open pools likely to contain or to have been used in the disposal of hazardous substances or petroleum products, or for waste disposal or waste treatment, were observed on the site.

#### **4.3.9 Stains or Corrosion and Stained Soil or Pavement**

No evidence of stains, corrosion, or stained soil or pavement was observed during the site reconnaissance.

#### **4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation**

No areas of dead, distressed, discolored, or stained vegetation that may indicate RECs were observed on the site.

#### **4.3.11 Possible Fill, Grading, or Solid Waste Disposal**

No history of solid waste disposal, fill, or grading is known to have taken place on the property.

#### **4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors**

No smells of chemical gases, petroleum products, or noxious odors were noted at the time of the site reconnaissance.

#### **4.3.13 Wastewater and Stormwater Systems and Discharges**

No wastewater or stormwater discharge systems were present at the site.

#### **4.3.14 Wells and Potable Water Supply**

No dry, irrigation, injection, abandoned, or other wells were observed on the site.

#### **4.3.15 Utilities**

The site is served by potable water, sewer service, electricity, and natural gas.

#### **4.3.16 Other Site-specific Environmental Conditions**

No other site-specific environmental conditions were noted during the site reconnaissance.

### **4.4 VICINITY RECONNAISSANCE**

Seagull surveyed the surrounding areas and conducted visual inspections from public roads during the Phase I TBA activities. Adjoining properties to the site include commercial and light industrial sites to the south and east. The BNSF railroad yard is located north of the subject property. Alter Scrap is located directly west of the subject property. Beyond Alter Scrap is the BNSF railroad corridor with several railroad tracks. The BNSF railroad yard and Alter Scrap pose RECs to the site based on historic uses of those properties.

## **5.0 INTERVIEWS**

The objective of conducting interviews is to obtain information concerning RECs in connection with the site. This information was obtained verbally, as indicated below. Interviewees were cooperative and forthcoming with information, unless otherwise specified.

### **5.1 INTERVIEW WITH OWNER**

The subject property is owned by Jaylynn LLC and occupied by Watson-Brickson Lumber. Seagull interviewed Mr. Bradley Devall, lumber yard manager, at the site on October 22, 2009. Mr. Devall did not have knowledge of any hazardous materials that may have been stored or spilled at the site. Mr

Devall was not aware of any USTs that have been used or were formerly located at the site. Mr. Devall was not aware of any issues of environmental concern.

## **5.2 INTERVIEW WITH KEY SITE MANAGER**

Mr. Devall is considered the key site manager. The interview is described above.

## **5.3 INTERVIEW WITH CURRENT OCCUPANTS**

The current occupants are Watson-Brickson Lumber personnel. The interview with the lumber yard manager is described above.

## **5.4 INTERVIEW WITH PAST SITE OWNER/OCCUPANTS**

No interviews were conducted with past owners of the site during this Phase I TBA.

## **5.5 INTERVIEW WITH LOCAL GOVERNMENT OFFICIAL**

Seagull conducted an Internet archive search of the City of Lincoln's Fire and Rescue records. There are no recorded incidents associated with the site.

# **6.0 RECORDS REVIEW**

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the site.

## **6.1 ENVIRONMENTAL RECORDS SOURCES**

The following sources of environmental records were accessed and reviewed as part of this assessment.

### **6.1.1 Environmental Database Search**

Federal, state, regional, and local records were reviewed to assess whether any unauthorized releases of hazardous substances or other events with potentially adverse environmental effects have occurred at the site or at any facility within the approximate minimum search distance. Environmental Data Resources (EDR) performed a database search of the site in accordance with ASTM E 1527-05 (EDR 2009a). A copy of this report is included as Appendix G.

The databases searched have been developed and are updated by federal, state, and local agencies. While these databases are generally reliable and comprehensive, some out-of-date data no longer reflecting actual site conditions may be encountered. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix G identifies when each database was updated.

A review of the facilities listed within the EDR Radius Map with GeoCheck<sup>®</sup> report (EDR 2009a) was conducted by Seagull. A summary of that review follows:

- The subject property was identified in the State and Tribal equivalent National Priorities List (SHWS) database. The listing in the database is likely associated with previous environmental investigations conducted at the site.
- In addition, 117 surrounding sites were identified in the database search and are summarized in the table below. Unless otherwise noted, the listed surrounding sites do not pose RECs to the subject property based on distance, topography, estimated groundwater flow direction, and/or current regulatory status

<b>Regulatory Database</b>	<b>Search Distance (in miles)</b>	<b>Total Sites Listed</b>
<b>Federal Records</b>		
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	0.50	1
Comprehensive Environmental Response, Compensation, and Liability Information System – No Further Remedial Action Planned (CERC-NFRAP)	0.50	3
Resource Conservation and Recovery Act – Corrective Actions Activity (RCRA CORRACT)	1.0	1
Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG)	0.25	3
Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generator (RCRA-CESQG)	0.25	6
<b>State and Local Records</b>		
State and Tribal National Priorities List (SHWS)	1.0	4
Leaking Underground Storage Tanks (LUST)	0.50	63
Leaking Aboveground Storage Tanks (LAST)	0.50	2
Registered Underground Storage Tanks (UST)	0.25	21
Local Registered Underground Storage Tanks (HIST UST)	0.25	4
Resource Conservation and Recovery Act – Non-Generators (RCRA-NonGen)	0.25	6
Formerly Used Defense Sites (FUDS)	1.0	1
<b>EDR Proprietary Records</b>		
EDR Proprietary Manufactured Gas Plants	1.0	2

### **CERCLIS**

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database contains data on potentially hazardous waste sites that have been reported to EPA by states, municipalities, private companies, and private persons. The CERCLIS database contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

- One CERCLIS site was identified within the search radius. This site does not pose a REC to the subject property.

### **CERCLIS-NFRAP**

The CERCLIS-No Further Remedial Action Planned (CERCLIS-NFRAP) database contains sites that have been removed and archived from the CERCLIS database. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the NPL, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

- Three CERCLIS-NFRAP sites were identified within the search radius. None of those sites present a REC to the subject property.

### **RCRA CORRACTS**

The Resource Conservation and Recovery Act, Corrective Action (RCRA CORRACTS) database is a list of handlers with RCRA corrective action activity.

- One RCRA CORRACTS site was identified within the search radius. This site does not pose a REC to the subject property.

### **RCRA Generators (RCRA-SQG and RCRA-CESQG)**

RCRA generators databases include listings for RCRA-Small Quantity Generators (RCRA-SQG) and RCRA-Conditionally Exempt Small Quantity Generators (RCRA-CESQG). RCRA-SQG facilities generate between 100 and 1,000 kilograms (kg) of hazardous waste, per month. RCRA-CESQG facilities generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste, per month.

- Nine RCRA generator sites were identified within the search radius. Of those nine sites, three were RCRA-SQG, and six were RCRA-CESQG sites. None of those sites pose RECs to the subject property.

### **State and Tribal NPL**

The State and Tribal NPL database (identified in the EDR report as SHWS) contains Superfund sites listed by NDEQ.

- Four SHWS sites were identified within the search radius. None of those sites pose RECs to the subject property.

### **Leaking Storage Tanks**

The leaking underground storage tank (LUST) and leaking aboveground storage tank (LAST) databases contain sites where spills associated with USTs and ASTs have been reported. These databases are managed by NDEQ.

- Sixty-three LUST sites were identified with the search radius. Two of those LUST sites are located in the near site vicinity (upgradient). Those sites are Lincoln Welding Inc. (216 S. 7<sup>th</sup> Street) and Linweld (601 N. Street). The LUST database identifies those sites as “no further action required”. Based on their close proximity (upgradient) to the site, those sites pose HRECs to subject property. The remaining LUST sites do not pose RECs to the subject property based on distance, topography, estimated groundwater flow direction, and/or current regulatory status.
- Two LAST sites were identified within the search radius. Neither of those sites presents a REC to the subject property.

### **Registered Storage Tanks**

The UST database contains a listing of state-registered USTs.

- Twenty-one UST sites were identified within the search radius. None of those sites present a REC to the subject property.

### **Local Registered Underground Storage Tanks**

The database of local registered storage tanks (identified in the EDR report as HIST UST) contains registered USTs.

- Four HIST UST sites were identified within the search radius. None of those sites pose a REC to the subject property.

### **Other Ascertainable Records**

These databases include RCRA-Non Generators (RCRA-NonGen) and Formerly Used Defense Sites (FUDS). RCRA-NonGen facilities do not presently generate hazardous waste. The FUDS database contains sites that the U.S. Army Corps of Engineers is actively investigating or where cleanup activities are being conducted.

- Six RCRA-NonGen sites and one FUDS site were identified within the search radius. None of those sites present a REC to the subject property.

### **EDR Proprietary - Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant database contains records of coal gas plants (FMGPs) compiled by EDR's researcher.

- Two FMGP sites were identified within the search radius. Lincoln Gas Works is listed at the northeast corner of South 6<sup>th</sup> Street and N Street, which is the subject property. Lincoln Gas Works is a FMGP that historical documents indicate was in operation from 1884 to 1891. Historical use of the site as a FMGP poses a REC to the subject property.

### **Unmapped Sites**

The EDR report identified 20 "orphan" facilities, which, because of poor or inadequate address information, could not be mapped by EDR. Based on site reconnaissance observations and information obtained from database research and on-line mapping resources, it is not likely any of these "orphan" sites pose a REC to the subject property. That determination was based on their cross-gradient or downgradient locations to the subject property, current regulatory site status (no further action required), or the fact they are located outside the approximate minimum search distance to the subject property.

#### **6.1.2 Valuation Reduction for Environmental Issues**

The City of Lincoln provided no information regarding valuation reduction for environmental issues associated with the site, other than indicating that the subject property is currently (and historically been) operated as a lumber yard, and an FMGP was located at the site.

#### **6.1.3 Engineering and Institutional Controls**

As part of the environmental records search performed by EDR, federal databases for institutional and engineering controls were searched, and no record information was reported.

#### **6.1.4 Title Records**

Land title records were not reviewed for this report.

### **6.2 HISTORICAL USE INFORMATION FOR THE SITE AND ADJOINING PROPERTIES**

Historical data regarding the site and surrounding area were gathered to determine past uses and evaluate visible environmental issues that may pose RECs. The following sections describe aerial photographs,

Sanborn® maps, topographic maps, and city directories that were available for the site. Historical use documentation referenced in the following sections is included as Appendix D.

### 6.2.1 Aerial Photographs

Historic aerial photographs of the site for the years 1953, 1978, 1981, 1987, 1993, 1999, and 2006 were obtained from EDR (EDR 2009b). A review of the aerial photographs is summarized below:

YEAR	COMMENTS
1953	<p><b>Site:</b> Several buildings are visible at the site. Due to the poor quality of the aerial photograph, no other site observations can be accurately made.</p> <p><b>Surrounding Area:</b> A railroad yard is located north of the subject property. The area south and east of the subject property appears to be developed for commercial and/or industrial purposes. An industrial facility and a railroad corridor are located west of the subject property.</p>
1978	<p><b>Site:</b> Several buildings are visible at the site. Due to the poor quality of the aerial photograph, no other site observations can be accurately made.</p> <p><b>Surrounding Area:</b> A railroad yard is located north of the subject property. The area south and east of the subject property appears to be developed for commercial and/or industrial purposes. An industrial facility and a railroad corridor are located west of the subject property.</p>
1981	<p><b>Site:</b> Due to the poor quality of the photograph, a detailed description is not possible.</p> <p><b>Surrounding Area:</b> Due to the poor quality of the photograph, a detailed description is not possible.</p>
1987	<p><b>Site:</b> Several buildings are visible at the site. The subject property appears similar to its current condition.</p> <p><b>Surrounding Area:</b> Additional buildings appear to be present south and southwest of the site. Areas east and west of the site have undergone no significant changes.</p>
1993	<p><b>Site:</b> There appears to be no significant changes to the site.</p> <p><b>Surrounding Area:</b> There appears to be no significant changes to the area.</p>
1999	<p><b>Site:</b> There appears to be no significant changes to the site.</p> <p><b>Surrounding Area:</b> There appears to be no significant changes to the area.</p>
2006	<p><b>Site:</b> There appears to be no significant changes to the site.</p> <p><b>Surrounding Area:</b> There appears to be no significant changes to the area.</p>

Review of the aerial photographs identified no RECs on or adjacent to the site.

## 6.2.2 Sanborn® Map Report

A search for historical fire insurance maps was conducted by EDR (EDR 2009c). Sanborn® maps for the years 1884, 1886, 1891, 1903, 1928, 1949, and 1968 were available for the area. The review of these Sanborn® maps is summarized below:

YEAR	COMMENTS
1884	<p><b>Site:</b> The map shows two gas holders and several other components associated with FMGP operations located in the southwest portion of the subject property. The north portion of the site contains a hotel, boarding house, and several dwellings.</p> <p><b>Surrounding Area:</b> A railroad yard containing coal yards are located north of the site. East of the site are two lumber yards. Dwellings are located south of the site. An oil storage facility with several large storage tanks is located directly west of the site, with a railroad corridor located beyond that to the west.</p>
1886	<p><b>Site:</b> The map shows a Gas Holder and several components associated with FMGP operations located in the southwest portion of the subject property. The north portion of the site contains a hotel, boarding house, and several dwellings.</p> <p><b>Surrounding Area:</b> A railroad yard containing coal yards are located north of the site. East of the site are two lumber yards. Dwellings are located south of the site. An oil storage facility with several large storage tanks is located directly west of the site with a railroad corridor located beyond that to the west.</p>
1891	<p><b>Site:</b> The map shows the Lincoln Gas Works located in the south-southwest portion of the site. A gasometer is located on the site, along with several other components associated with FMGP operations. A coal shed is located on the east side of the site. The northern portion of the site contains a hotel and boarding house.</p> <p><b>Surrounding Area:</b> The surrounding area appears to be primarily used for railroad and commercial/industrial purposes.</p>
1903	<p><b>Site:</b> The map shows the P.D. Smith Company Lumber &amp; Coal Yard at the site.</p> <p><b>Surrounding Area:</b> The surrounding area appears to be primarily used for railroad and commercial/industrial purposes.</p>
1928	<p><b>Site:</b> The map shows the Dierks-Drumm Lumber Company at the site.</p> <p><b>Surrounding Area:</b> The surrounding area appears to be primarily used for railroad and commercial/industrial purposes.</p>
1949	<p><b>Site:</b> The map shows the Watson-Brickson Lumber Yard at the site. The site contains four buildings associated with lumber yard operations and one office.</p> <p><b>Surrounding Area:</b> The surrounding area appears to be primarily used for railroad and commercial/industrial purposes. Directly west of the site is the Hill &amp; Neiden Iron &amp; Metal Scrap Yard.</p>

YEAR	COMMENTS
1968	<p><b>Site:</b> The map shows the Watson-Brickson Lumber Yard at the site. The site contains four buildings associated with lumber yard operations and one office.</p> <p><b>Surrounding Area:</b> The surrounding area appears to be primarily used for railroad and commercial/industrial purposes. Directly west of the site is the Hill &amp; Neiden Iron &amp; Metal Scrap Yard.</p>

Review of the Sanborn maps determined a FMGP was located at the site from at least 1884 to 1891. The site has been occupied/operated as a lumber yard since 1903. In addition, adjacent properties have historically been used for railroad and industrial/commercial purposes. The adjacent property to the west has been operated as a metal scrap yard since 1949. The FMGP located at the site and facilities located on adjacent properties (railroad yard and scrap yard, in particular) could be potential sources of contamination if releases of hazardous materials or wastes occurred; therefore, they pose RECs to the subject property.

### 6.2.3 Historical Topographic Maps

Seagull reviewed topographic maps for the Lincoln, Nebraska, quadrangle from 1964, 1972, and 1980 (EDR 2009d) for information regarding past uses of the site. The site appears to remain unchanged throughout the observed timeline.

### 6.2.4 City Directories

City directories can be used in conjunction with other historical records presented in this section to determine previous land use at the site and at surrounding properties. The city directory abstract was provided by EDR (EDR 2009e), and was reviewed for information regarding past use of the subject property. The site address (660 N Street) was listed in city directories dating back to 1953. Business listings associated with the site include Watson-Brickson Lumber Company (current occupant), Watson-Brickson Sales, Folmer and Folmer Inc., and Lincoln Coal Company. No RECs were identified from review of the city directories. In addition, multiple surrounding addresses are listed and identified as residential, commercial, and industrial properties.

## 7.0 FINDINGS

The following significant findings were identified from review of historic records, environmental database review, site reconnaissance, or interviews.

- The subject property was identified on historical Sanborn® maps as the —Incoln Gas Works,” which was a FMGP. FMGP operations commonly produced significant amounts of waste

products, many of which contained hazardous materials. Historical use of the subject property as a FMGP poses a REC to the site.

- Site reconnaissance findings and a review of historical information determined that commercial and industrial properties are located adjacent to the site. In particular, a railroad yard is currently located adjacent to the subject property to the north. The railroad yard has been in operation since the late 1800s. In addition, a metal scrap yard is located adjacent to the subject property to the west. This property has been operated as a scrap yard since 1949. These facilities could be potential sources of contamination. The likelihood of release of hazardous materials or wastes from these facilities poses RECs to the subject property.
- Phase I and Phase II ESAs were previously conducted by HWS in August 2007 and May 2008, respectively. Laboratory analysis of soil samples collected during the Phase II ESA revealed concentrations of contaminants commonly associated with FMGP sites (VOCs and SVOCs) that exceeded their health-based benchmarks.
- Two sites located upgradient of the subject property have been identified as HRECs. Both of those sites are LUST sites that are no longer active (no further action required).

## **7.1 DATA GAP ANALYSIS**

One deviation from ASTM E 1527-05 was noted for this Phase I TBA. The Mini-START Environmental Professional (EP) has conducted an analysis of the data gaps or failures resulting from this deviation, and assessed impacts of these on Mini-START's ability to render an opinion regarding conditions indicative of releases or threatened releases of petroleum products or hazardous substances. A summary of that assessment follows.

- Time gaps of more than 5 years were present in available historical information. Historical documents were reviewed back to 1884. Given the consistent observed use of the subject property in the historic information reviewed, it is not necessary to review additional time periods, and the lack of information for all 5-year-or-less intervals is not considered data failure.

## **8.0 OPINIONS**

RECs (and HRECs) to the site, described in Section 7.0, have been identified during this Phase I TBA. Through records review and interviews, the subject property was determined to have been operated as a FMGP. Surrounding properties have historically been operated as a railroad yard and metal scrap yard. In addition, two upgradient LUST sites have been identified. In the opinion of the Environmental Professional, the aforementioned RECs (and HRECs) should be addressed prior to future development at the site.

## **9.0 CONCLUSIONS AND RECOMMENDATIONS**

Seagull has performed a Phase I TBA in conformance with the scope and limitations of ASTM Practice E 1527-05 for the Jaylynn LLC property. Any exceptions to, or deletions from, this practice are described

in Section 1.4 of this report. Based on available information, this assessment has revealed evidence of RECs (and HRECs) associated with the site, as described in Sections 7.0 and 8.0. Based on the identification of those RECs, Seagull provides the following recommendations:

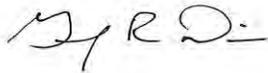

- Seagull recommends a Phase II TBA of the site. Soil and groundwater samples should be collected and analyzed for contaminants commonly associated with FMGP sites, as well as other historical industrial contaminants, including VOCs, SVOCs, total petroleum hydrocarbons, and metals. Phase II TBA sampling activities should include both soil and groundwater sampling to characterize the vertical and horizontal extent of contamination on the subject property.

## 10.0 CERTIFICATION STATEMENT

Resumes of the site assessor who conducted the site reconnaissance and prepared the report, and the Environmental Professional who oversaw completion of this work, are provided in Appendix H. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the site addressed in this report. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312, and attest to the completeness and accuracy of the information contained in this report.

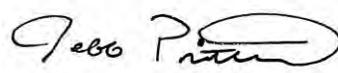

If you have any questions concerning the findings and conclusions contained in this report, please call Site Assessor Greg Dillon at (785) 760-2645, or Environmental Professional Jeff Pritchard at (816) 412-1937.

**APPENDIX A**

**SCOPE OF WORK AND BROWNFIELDS PROPERTY PROFILE FORM**

**8(a) Mini-START Task Order  
Contract No. EP-S7-09-01  
Seagull Environmental**

**Javlenn LLC Property  
660 N Street  
Lincoln, Nebraska**

**Updated Phase I  
and  
Phase II Targeted Brownfields Assessment with Cleanup Planning**

**I. Site History**

The Javlenn LLC Property is occupied by Watson-Brickson Lumber and is located at 660 N Street, Lincoln, and Nebraska. The property is currently being used as a lumberyard facility.

In a previous Phase I Environmental Site Assessment (ESA) dated August 2007 and prepared by HWS Consulting Group, the Property comprising approximately 1.09-acres. Historical sources identified "Lincoln Gas Works" on the Property in 1891. By 1928 the Property was occupied by lumber company operations and continues to the present. Some commercial buildings and structures have been located on the Property during this period.

A limited Phase II ESA was completed on this property. A summary of this investigation is attached to this Statement of Work (SOW). Further assessment was recommended to adequate characterization of the groundwater plume, soil impact and appropriate remedial options to consider in concert with future use.

**II. Objective and Scope**

The work to be conducted under this task order is to perform an updated Phase I Targeted Brownfields Assessment (TBA) and a Phase II TBA with cleanup planning on the property.

The objectives of a Targeted Brownfield Assessments (i.e., Environmental Site Assessment) are to identify the nature and extent of contamination on-site and the risks posed by the contamination. The Environmental Site Assessment (ESA) in Region 7 is performed in conformance with the following:

- "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," ASTM, E1527-05;
- "All Appropriate Inquiry" Final Rule, 40 C.F.R. Part 312;
- "Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process," ASTM, E 1903-97; and
- "Generic Quality Assurance Project Plan for the Superfund Integrated Site

Assessment and Targeted Brownfields Assessment Programs,” EPA-Region VII,  
Superfund Division, July 2007

The purpose of the Phase I ESA is to identify recognized environmental conditions in connection with the property. The Phase I ESA shall have the following components: 1) records review, 2) site reconnaissance, 3) interviews, and 4) report.

The primary objectives of conducting a Phase II ESA are to evaluate the recognized environmental conditions identified in the Phase I ESA for the purpose of providing sufficient information regarding the nature and extent of contamination to assist in making informed business decisions about the property; and where applicable, providing the level of knowledge necessary to satisfy the innocent purchaser defense under CERCLA. The Phase II ESA shall have the following components: 1) developing the scope of work, 2) assessment activities, 3) evaluation and presentation of data, and 4) presentation of findings and conclusions.

### **III. General Task Requirements**

For the purpose of this Performance Work Statement (PWS), the words, “The contractor shall” means that the contractor will, in accordance with applicable laws, regulations, guidance and policies, furnish fully trained personnel, services, materials, equipment, property, facilities, knowledge, and expertise to successfully complete the tasks required under this SOW. The contractor shall ensure that any and all services or products shall be delivered and provided under this contract in compliance with all applicable Federal, state, and local laws, regulations, guidance and policies and any changes to those laws which become effective after the effective date of this contract.

In conducting this work the EPA expects the contractor to propose the most appropriate and cost-effective procedures and methodologies using accepted engineering practices and controls. Throughout the performance on this task order, the Contractor will be responsible for performing services and providing products using the most cost-effective mix of qualified personnel applicable to meet the needs of the PWS.

### **IV. Task Order**

An application has been submitted by the City of Lincoln to conduct an updated Phase I ESA and to conduct a Phase II ESA with Cleanup Planning for the Union Pacific Railroad Turntable Area property. A copy of this application is attached to this SOW.

The contractor shall follow EPA guidance and the Industry Standards for conducting these assessments and includes the follow tasks.

1. Review of the EPA Targeted Brownfields Assessment application form prepared by the City of Lincoln, Nebraska. This application was used in the development of this Statement of Work. A copy of the application is attached to this statement of work.

2. After initial discussion with the EPA Task Order Manager, the contractor will contact the contact person, Ernie Castillo. Mr. Castillo telephone number is 402-441-7855 and email address is <ECastillo@lincoln.ne.gov>.
3. Obtain a copy of the complete Phase I ESA dated August 2007. Parts of this report are attached to this SOW. This property is owned by the Javlvnn LLC. Because of this, it will be necessary to coordinate closely with the City of Lincoln to obtain access to the property.
4. Review the completed Phase I ESA dated August 2007 and any other appropriate documents related to this property.
5. Complete an updated Phase I Environmental Site Assessment and report.
6. Prepare a Quality Assurance Project Plan (QAPP). As part of this task order, the contractor will obtain the services of a qualified laboratory for all analysis.
7. The components of Subpart C-Standards and Practices in the All Appropriate Inquiry Final Rule, 40 C.F.R. Part 312 will be meet.
8. Complete a Phase II Environmental Site Assessment and report, which will include a cleanup plan.
9. Prepare a Brownfields Property Profile Form.

**V. Period of Performance**

Period of Performance (POP) is March 15, 2010.

**VI. Schedule of Deliverables**

The updated Phase I ESA report due date is be based on the degree of work needed to complete a Phase I ESA. The draft Phase II ESA report is due by February 28, 2010.

OR IS  MINE-SCARRED LAND?

YES (describe below)  NO  UNKNOWN

*(hazardous substances as defined in 40 CFR Part 30, e.g., solvents, pesticides, creosote, metals (lead, mercury, arsenic, etc.), dry cleaning products; controlled substances as defined under the Controlled Substances Act, e.g., methamphetamines, other illegal drugs).*

Phase I and Phase II reports indicated potential contaminants. Both reports are available for your review.

**IF PROPERTY IS OWNED BY APPLICANT, DID APPLICANT**

(1) GENERATE OR DISPOSE OF ANY OF THE CONTAMINANTS?  YES (describe below)  NO  UNKNOWN

(2) OWN THE PROPERTY WHEN CONTAMINATION OCCURRED?  YES (describe below)  NO  UNKNOWN

REGARDLESS OF PROPERTY OWNERSHIP, IS APPLICANT AWARE OF ANY FEDERAL, STATE, OR LOCAL AGENCY INQUIRY OR ORDER REGARDING ANY PARTY'S RESPONSIBILITY FOR CONTAMINATION OR HAZARDOUS WASTE AT THE PROPERTY?

YES (describe below)  NO

BRIEFLY DESCRIBE INVOLVEMENT / ROLE OF AGENCY IN ENFORCEMENT AND / OR OVERSIGHT OF THE INQUIRY OR ORDER:

<b>PROPERTY ZONING</b> (attach site map, if available):		<b>TOTAL ACREAGE OF PROPERTY:</b>
H1 Industrial District		1.09
<b>PAST PROPERTY USES</b> (type of manufacturing, etc.):		<b>APPROXIMATE DATES:</b>
Lumberyard		1928 to present
Coal Gas Plant		1890s to 1928
<b>BUILDINGS ON PROPERTY</b>	<b>SQUARE FOOTAGE</b>	<b>CONDITION</b> (usable, gutted, razed, etc.)
Small office building	1,000sf	Usable
Several storage structures	Unknown	Usable
<b>PRIOR PROPERTY/SITE ASSESSMENT ACTIVITIES:</b> <input checked="" type="checkbox"/> COMPLETED <input type="checkbox"/> NONE <input type="checkbox"/> UNKNOWN <b>DESCRIBE CONCLUSIONS OF PRIOR SITE ASSESSMENT ACTIVITIES</b> (or attach "conclusion" section of report(s)): Phase I and Phase II reports completed in 2007-08. Phase I summary information included. <b>IF REPORTS ARE UNAVAILABLE, IDENTIFY CONSULTANT, CLIENT, AND APPROXIMATE DATE OF STUDY:</b>		
<b>PROPERTY/SITE ASSESSMENT NEEDS:</b> <b>DESCRIBE DIFFICULTIES RELATED TO PERCEIVED CONTAMINATION THAT HAVE HINDERED REUSE OF THE PROPERTY:</b> Further Phase II work is needed as we work toward redevelopment of the West Haymarket area.		
<b>ANTICIPATED FUTURE USE:</b> <input type="checkbox"/> RESIDENTIAL <input type="checkbox"/> RECREATIONAL <input checked="" type="checkbox"/> COMMERCIAL / RETAIL <input type="checkbox"/> INDUSTRIAL <input checked="" type="checkbox"/> OTHER (SPECIFY):		
<b>DESCRIBE APPLICANT'S PROPOSED REUSE PLAN:</b> Over the last several years, the City of Lincoln has undertaken a comprehensive redevelopment effort in the area just east of downtown. This property is one of several we are seeking Brownfields Targeted Assessment funds in order to complete a comprehensive environmental review of the area. The reuse for the area involves a 16,000 seat civic center, a two-sheet community ice center, retail, office and hotel development. With this development comes an improved street and transportation network, expanded parking, reconstructed natural environmental areas, and upgraded watershed management facilities.		
<b>DESCRIBE ANY FINANCIAL INCENTIVES PLANNED TO SPUR DEVELOPMENT AND/OR CLEANUP AND PROPOSED FUNDING SOURCES</b> (tax incentives, etc.): Tax Increment Financing, State Turn-back tax and private contributions. <i>(EPA's BTA program is for site assessment only; cleanup money is not being offered as part of this program.)</i>		
<b>DESCRIBE PUBLIC INTEREST AND / OR COMMUNITY INVOLVEMENT IN PROPERTY REUSE PLANNING:</b> Many public meetings have been held including community-wide meetings, presentations to different organizations, a web-site (w/ comments), public hearings, neighborhood meetings, and business association meetings.		
<b>SUBMIT COMPLETED FORMS TO:</b> Ronald King, Brownfields Targeted Assessment Program Mail Code: SUPR/ERNB U. S. Environmental Protection Agency - Region 7 901 North 5 <sup>th</sup> Street Kansas City, Kansas 66101		
Created 3/15/08		

## PART II- ENVIRONMENTAL ACTIVITIES

**ENVIRONMENTAL ASSESSMENT INFORMATION** (mandatory for Assessment Cooperative Agreements, State & Tribal Property-Specific Assessments, and TBAs; as available for Cleanup and RLF cooperative agreement recipients; CA = Cooperative Agreement)

**Table A – Environmental Assessment Activity** (If there are multiple assessments, please use a separate line for each assessment)

Environmental Assessment Detail			Source of Funding <small>(enter one source of funding per line; do not include funding received prior to the award of this</small>					Name of Entity Providing Funds	Amount of Funding Expended on this Activity
Activity	Start Date	Completion Date	This US EPA CA	Other Federal	State/Tribal (exclude §128(a) funds)	Local Gov't	Private/Other		
Phase I	8/12/2009	4/15/2010	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	USEPA Region 7	\$3,500.00
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

12. Indicate whether cleanup is required:       Yes       No       Unknown

### CONTAMINANTS & MEDIA AFFECTED INFORMATION

*(mandatory for all cooperative agreement types)*

**Table B - Contaminants and Media Affected** (check all that apply):

Contaminants			
Class of Contaminant	REC*	Found	Cleaned Up
Petroleum/Petroleum Products	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Controlled Substances	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## **Certified Sanborn® Map Report Enhancements for 2009**

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

- Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.
- All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.
- We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.
- A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit [www.edrnet.com/2009enhancements](http://www.edrnet.com/2009enhancements)

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

**APPENDIX E**  
**USER-PROVIDED INFORMATION**

User Name: City of Lincoln

Site Name: Jaylynn Property

Prepared by: Ernie Castillo – Urban Development

---

**(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? NO

**(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? NO

**(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? NO

**(4) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? Would be fair market value.

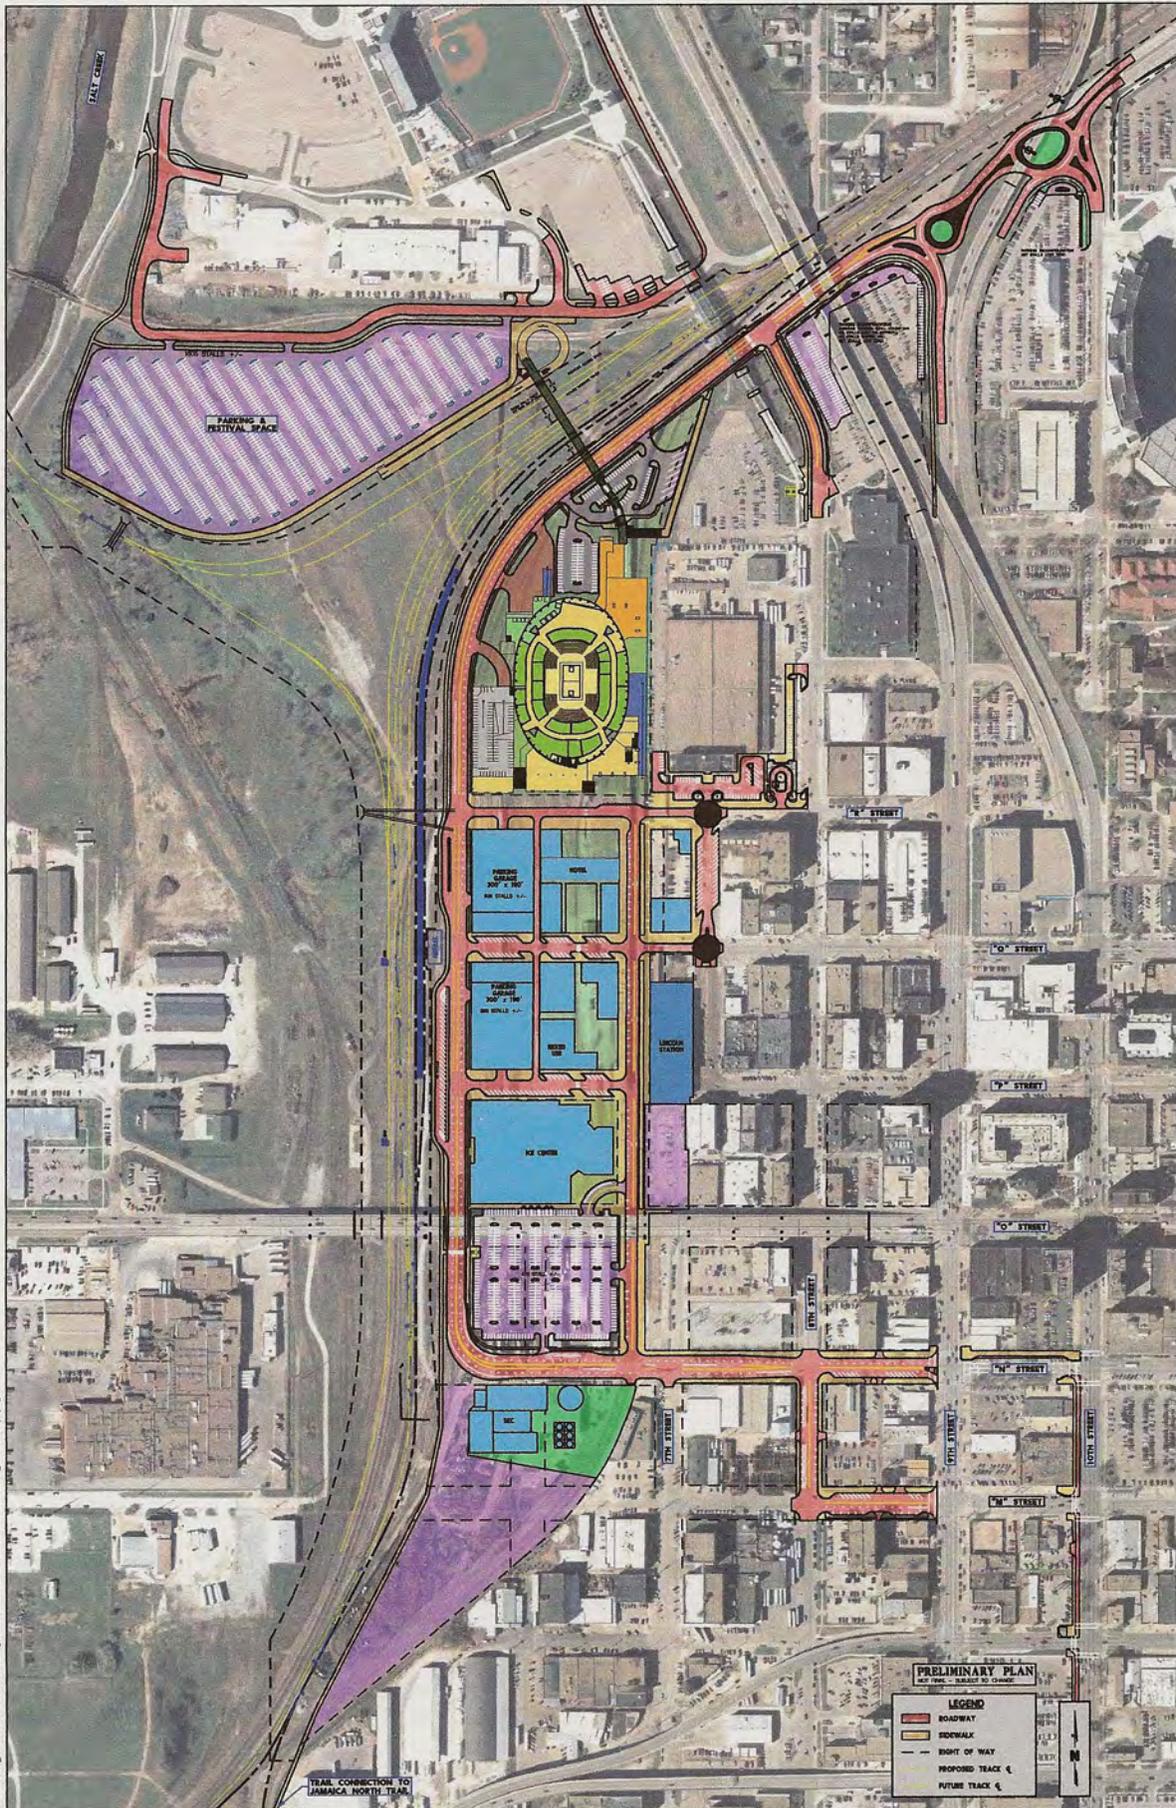

**(5) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).**

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

- (a.) Do you know the past uses of the *property*? NO—Other than historic use as a Coal Gas Plant
- (b.) Do you know of specific chemicals that are present or once were present at the *property*? NO
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*? NO
- (d.) Do you know of any environmental cleanups that have taken place at the *property*? NO

**(6) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? NO—other than previous Phase II investigations conducted at the site that determined contaminants associated with coal gas plants were present in the soil and groundwater.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## TARGET PROPERTY INFORMATION

### ADDRESS

660 N STREET  
LINCOLN, NE 68508

### COORDINATES

Latitude (North): 40.813100 - 40° 48' 47.2"  
Longitude (West): 96.712400 - 96° 42' 44.6"  
Universal Transverse Mercator: Zone 14  
UTM X (Meters): 692945.8  
UTM Y (Meters): 4520316.5  
Elevation: 1156 ft. above sea level

## USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 40096-G6 LINCOLN, NE  
Most Recent Revision: 1980

## AERIAL PHOTOGRAPHY IN THIS REPORT

Portions of Photo from: 2005, 2006

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 06/30/2009 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>LINCOLN GAS &amp; ELECTRIC LIGHT C</i></b>	<b><i>2ND ST &amp; 'M' ST</i></b>	<b><i>WSW 1/4 - 1/2 (0.308 mi.)</i></b>	<b><i>W79</i></b>	<b><i>63</i></b>

#### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/30/2009 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>TRAFFIC ENGINEERING</b>	<b>1001 NORTH 6TH</b>	<b>N 1/2 - 1 (0.674 mi.)</b>	<b>112</b>	<b>81</b>

### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **State- and tribal - equivalent NPL**

SHWS: The Nebraska Department of Environmental Quality is providing this information from its own database. The data, although not verified to be the most current or accurate for any specific site, is generally based on the contents of the physical documents in the files. You may contact the Records Management Unit at (402) 471-3557 to make arrangements to view or to get a photocopy of the physical file.

A review of the SHWS list, as provided by EDR, and dated 09/29/2009 has revealed that there are 4 SHWS sites within approximately 1 mile of the target property.

### **State and tribal leaking storage tank lists**

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Control's Spill Tracking Reports.

A review of the LUST list, as provided by EDR, and dated 07/15/2009 has revealed that there are 63 LUST sites within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Control's Facility and Tank Data.

A review of the UST list, as provided by EDR, and dated 07/30/2009 has revealed that there are 21 UST sites within approximately 0.25 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Registered Storage Tanks**

HIST UST: A listing of underground storage tank locations. This listing contains detail information that the UST listing does not. It is no longer updated by the agency. For current information see the UST listing.

A review of the HIST UST list, as provided by EDR, and dated 02/28/2005 has revealed that there are 4 HIST UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **Other Ascertainable Records**

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there

## EXECUTIVE SUMMARY

are 6 RCRA-NonGen sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### EDR PROPRIETARY RECORDS

#### ***EDR Proprietary Records***

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within approximately 1 mile of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that

discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System**

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System  
 AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FUDS Description Details:**

CONSISTS OF 20.34 ACRES AND IS LOCATED APPROXIMATELY SIX MILES NORTHWEST OF LINCOLN, NE. THE SITE WAS UTILIZED AS AN OFF-BASE COMMUNICATION TRANSMITTER FACILITY FOR THE LINCOLN AIR FORCE BASE. IMPROVEMENTS CONSISTED OF THE TRANSMITTER BUILDING, TWO UNDERGROUND STORAGE TANKS, WATER STORAGE TANKS, SEWAGE SEPTIC TANK, SANITARY SEWER MAIN, ROADS, PARKING AND FENCING. THE FORMER COMMUNICATIONS BUILDING HAS BEEN CONVERTED TO LIVING QUARTERS.

**FUDS History Details:**

20.34 ACRES WERE ACQUIRED IN 1959 FOR USE AS A COMMUNICATION TRANSMITTER ANNEX FOR THE LINCOLN AFB. A SAC PLAN 1000 RADIO WAS OPERATED AT THE SITE. THE TRANSMITTER WAS OPERATED REMOTE FROM THE LINCOLN AFB TO SATISFY FAA REGULATION. IN APRIL 1966, WHEN THE LINCOLN AFB WAS PHASED OUT, THE SITE WAS REPORTED EXCESS TO THE GSA. THE LAND WAS TRANSFERRED TO PRIVATE OWNERSHIP BY QUITCLAIM DEED IN MAY 1967.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NE-IIS (Nebraska Integrated Information System). The Nebraska Department of Environmental Quality's system maintains the EPA's facility files.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/29/2009	Source: EPA
Date Data Arrived at EDR: 07/31/2009	Telephone: N/A
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 10/14/2009
Number of Days to Update: 52	Next Scheduled EDR Contact: 01/25/2010
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/29/2009	Source: EPA
Date Data Arrived at EDR: 07/31/2009	Telephone: N/A
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 10/14/2009

	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/29/2009	Source: EPA
Date Data Arrived at EDR: 07/31/2009	Telephone: N/A
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 10/14/2009

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 41	Next Scheduled EDR Contact: 01/11/2010
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

	Data Release Frequency: Varies

## ***State and tribal institutional control / engineering control registries***

### INST CONTROL: Nebraska's Institutional Control Registry

A list of sites within Nebraska that have institutional controls. According to the Environmental Protection Agency (EPA), institutional controls are "non-engineering measures designed to prevent or limit exposure to hazardous substances left in place at a site, or assure effectiveness of the chosen remedy. Institutional controls are usually, but not always, legal controls, such as easements, restrictive covenants, and zoning ordinances." In short, institutional controls are a type of environmental covenant typically used when property is to be cleaned up to a level determined by the potential environmental risks posed by a planned use, rather than to unrestricted use standards. This method of control has proven to be both environmentally and economically beneficial.

## **State and tribal Brownfields sites**

### BROWNFIELDS: Potential Brownfields Inventory Listing

"NDEQ defines a brownfields site as subpart (A) of CERCLA ? 101(39): 'Real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.' This is a broad-based approach to capture all potential brownfields sites. In the event that CERCLA 128(a) State Response Program funds are utilized - for example, conducting a Section 128(a) Assessment - the exclusions, site-by-site determinations, and further definitions as provided by the law would need to be met. This would be done on a site-by-site basis." A preliminary Survey and Inventory of Brownfields Sites in Nebraska was constructed based on previously submitted information including sites named specifically by city representatives. The list was built on facility characteristics, which were founded on previous, broad-based contamination experience. Additions to the inventory were made by looking for other sources of potential brownfields sites using Standard Industrial Classification (SIC) codes. A general sector list was constructed to serve as an inventory guide. This list shows all of the different types of sites that are within the inventory (sorted by SIC code), and the number of sites there are of each type. Color-coated blocks, which group together similar SIC codes and the sites that they encompass also sort the sectors.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## Other Ascertainable Records

### RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 11/12/2008

	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy
Date Data Arrived at EDR: 05/07/2009	Telephone: 505-845-0011

	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 05/28/2009	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 06/23/2009	Telephone: 303-231-5959
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 09/18/2009
Number of Days to Update: 90	Next Scheduled EDR Contact: 12/21/2009
	Data Release Frequency: Semi-Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2007	Source: EPA
Date Data Arrived at EDR: 04/09/2009	Telephone: 202-566-0250
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 09/14/2009
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 10/07/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 01/11/2010
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 07/23/2009	Source: EPA
Date Data Arrived at EDR: 07/28/2009	Telephone: (913) 551-7003
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 09/18/2009
Number of Days to Update: 55	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Child Care Listing

Source: Department of Health & Human Services

Telephone: 402-471-2306

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: National Wetlands Inventory

Source: Department of Natural Resources

Telephone: 402-471-2363

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

JAYLYNN LCC PROPERTY  
660 N STREET  
LINCOLN, NE 68508

### TARGET PROPERTY COORDINATES

Latitude (North):	40.81310 - 40° 48' 47.2"
Longitude (West):	96.7124 - 96° 42' 44.6"
Universal Tranverse Mercator:	Zone 14
UTM X (Meters):	692945.8
UTM Y (Meters):	4520316.5
Elevation:	1156 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	40096-G6 LINCOLN, NE
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

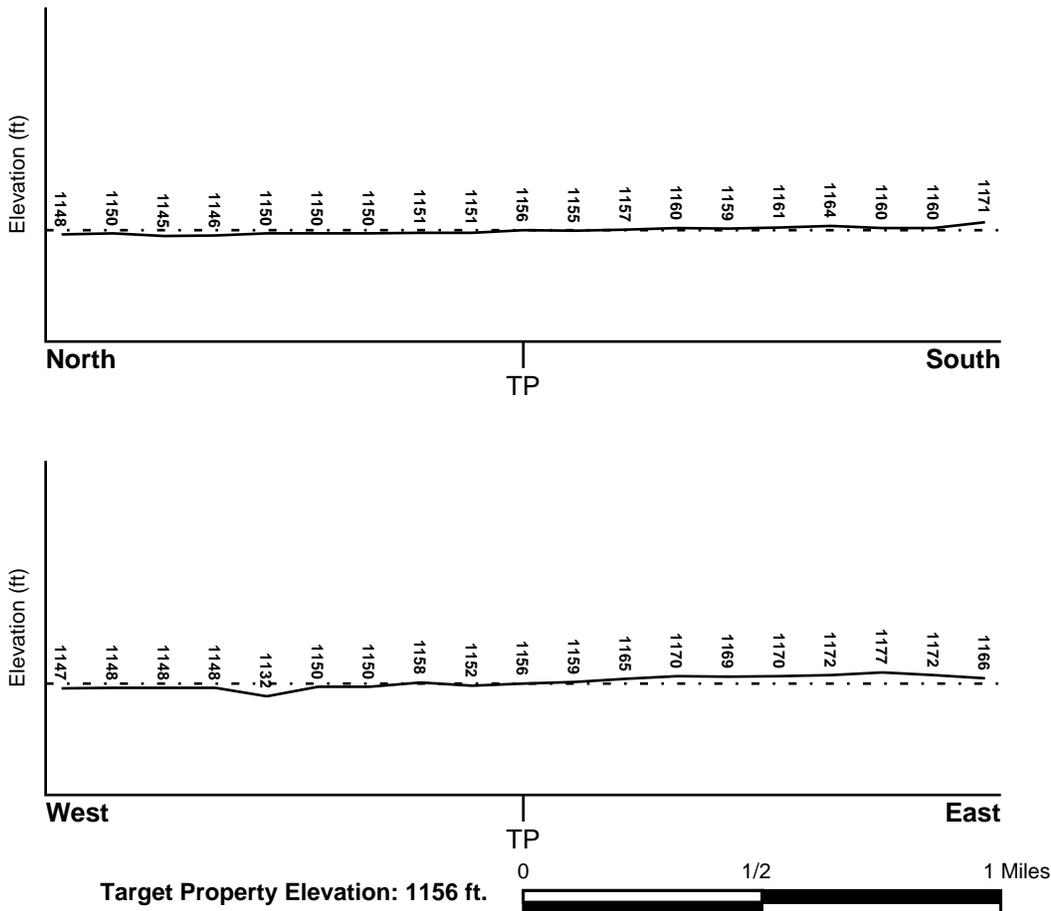

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u> LANCASTER, NE	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	3152730025C
Additional Panels in search area:	Not Reported

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> LINCOLN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

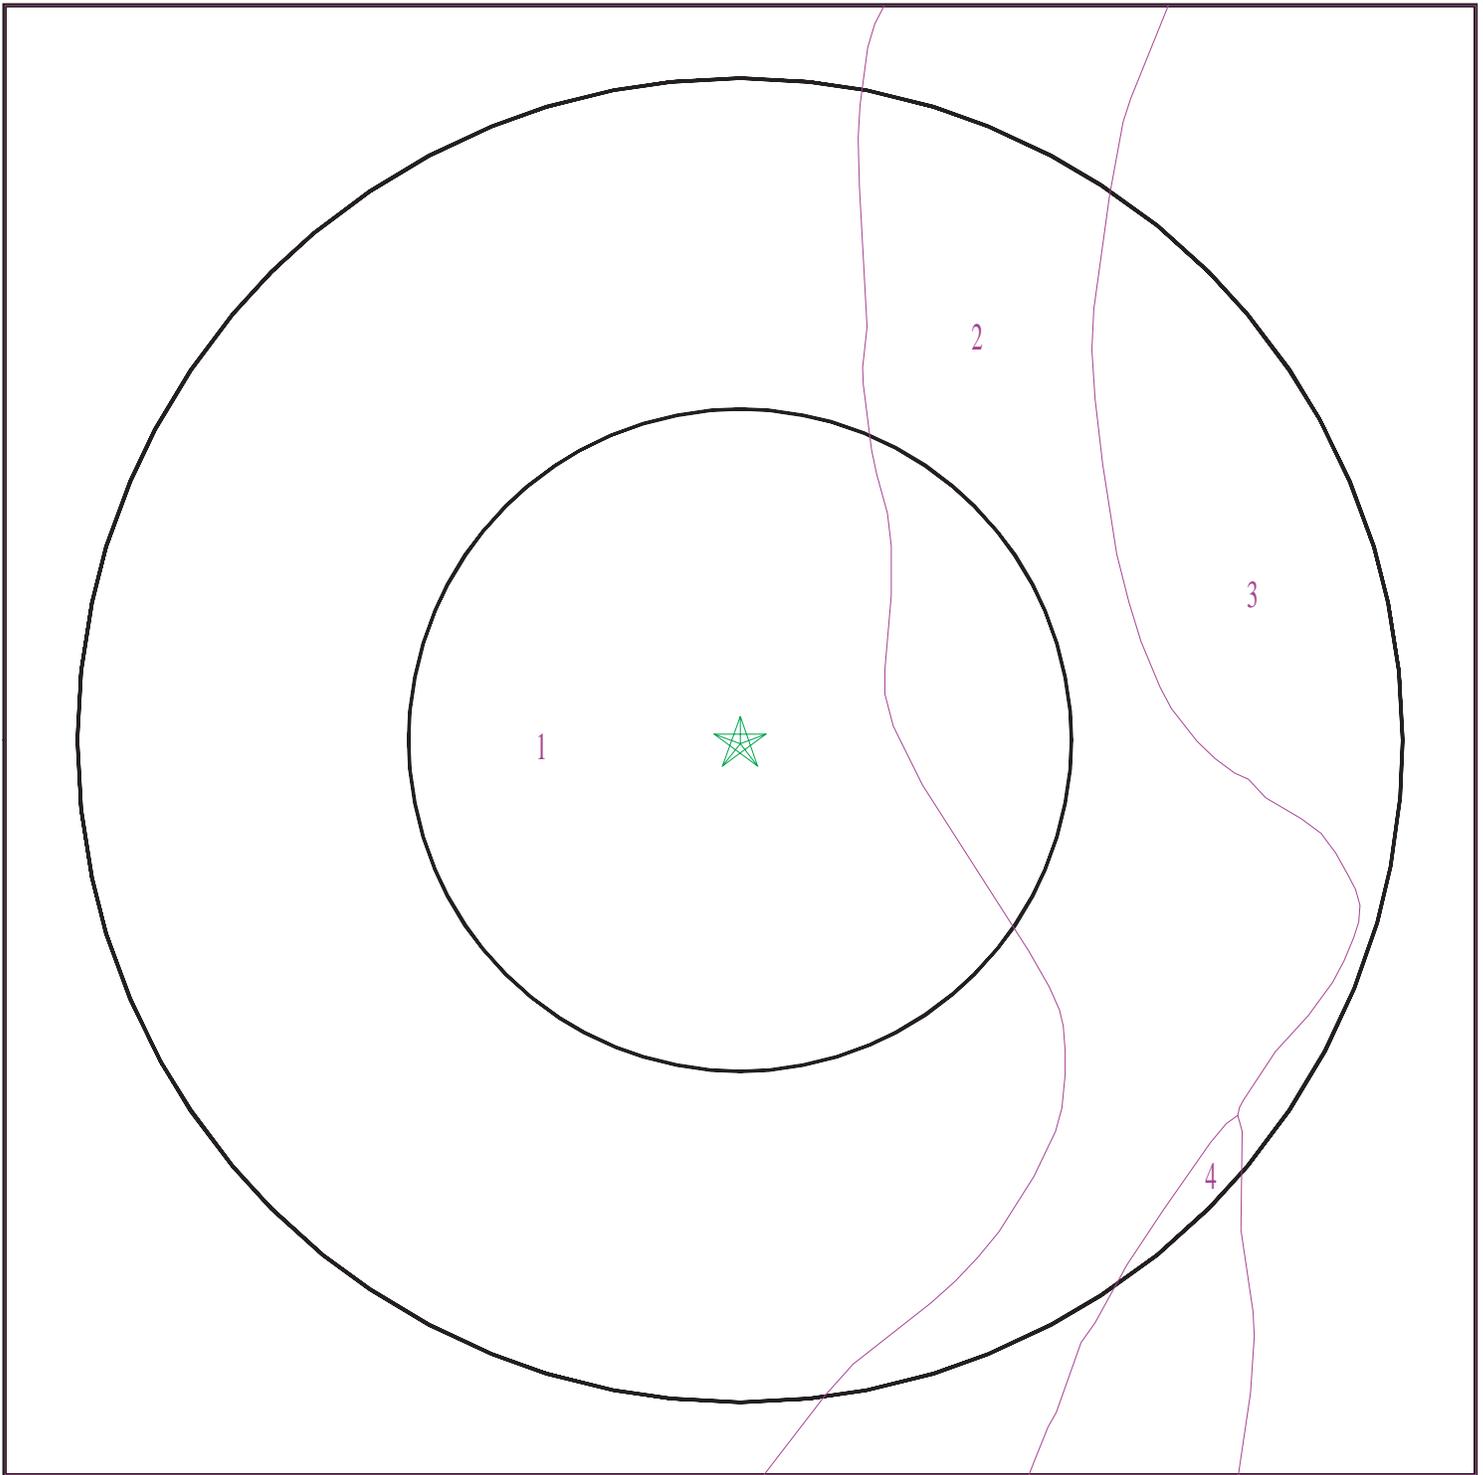

Era: Mesozoic  
System: Cretaceous  
Series: Woodbine and Tuscaloosa Groups  
Code: uK1 (*decoded above as Era, System & Series*)

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: 42.33 Min: 0.4233	Max: Min:

### Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: National Wetlands Inventory

Source: Department of Natural Resources

Telephone: 402-471-2363

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Registered Groundwater Wells Database

Source: Department of Natural Resources

Telephone: 402-471-2363

Water use types include Aquaculture, Commercial/Industrial, Domestic, Ground Heat Exchanger, Heat Pump (Ground Water Source), Irrigation, Injection, Observation (Ground Water Levels); Other - Lake Supply, Fountain, Geothermal, Wildlife, Wetlands, Recreation, Plant and Lagoon, Sprinkler, Test, Vapor Monitoring; Public Water Supply with Spacing Protection, Monitoring (Ground Water Quality), Recovery, Livestock, Geothermal, Public Water Supply without Spacing Protection, Dewatering (Over 90 Days).

## OTHER STATE DATABASE INFORMATION

### RADON

#### State Database: NE Radon

Source: Department of Environmental Quality

Telephone: 402-471-0594

Summary of Radon Data

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

**APPENDIX H**

**ASSESSOR AND ENVIRONMENTAL PROFESSIONAL RESUMES**

**GREGORY R. DILLON**  
*Environmental Scientist*

**SPECIALTIES**

- Removal Site Evaluations
- CERCLA Site Assessments
- Field Screening

**EDUCATION**

- B.G.S., Environmental Studies, Minor in Sociology, University of Kansas, Lawrence, Kansas

**RELEVANT EXPERIENCE**

Mr. Dillon serves as an Environmental Scientist for environmental site assessment and cleanup activities conducted under the United States Environmental Protection Agency (EPA) Region 7 Superfund Technical Assessment and Response Team (START) and mini-START contracts. Under those contracts, Mr. Dillon has managed and participated in Targeted Brownfields Assessments, pre-Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Screenings, Integrated Site Assessments (ISA), and removal actions. For those sites, he has developed quality assurance project plans (QAPP), conducted site background research, and interviewed involved parties to identify potential contamination. Field work at those sites has included contacting property owners on a door-to-door basis to obtain access for sampling, and collecting multi-media samples for field screening and laboratory analysis. Mr. Dillon has also been a secondary responder for emergency response activities.

In addition, Mr. Dillon has experience as a lab and field assistant for the Kansas Biological Survey (KBS). As a lab assistant, Mr. Dillon was responsible for sorting and numeration of central plains aquatic macroinvertebrate samples to order level. Mr. Dillon was also able to achieve taxonomic identification of Ephemeroptera, Trichoptera, and Hemiptera down to genus level. As a field assistant, Mr. Dillon participated in the 2007 EPA Lakes Survey, the 2008 National Rivers and Streams Assessment, and the 2008-2009 Missouri River Tributaries Assessment. He was responsible for water sample collection and filtration, macroinvertebrate collection, electroshock fishing, physical habitat assessment, boat operation and navigation, sample preparation, and shipping and surveying.

Mr. Dillon also participated in the National Rivers and Streams Assessment EPA Region 7 Field Training Workshop.

## **EMPLOYMENT HISTORY**

Seagull Environmental Technologies, Inc., Overland Park, Kansas, Environmental Scientist,  
March 2009 to Present.

Kansas Biological Survey: Central Plains Center for Bioassessment (CPCB), Lawrence, Kansas, Field  
and Lab Assistant, 2006 to 2008.

## **TRAINING**

40-Hour Hazardous Waste Operations Training, Overland Park, Kansas, 2009

EPA Hazard Ranking System Training, Kansas City, Kansas, 2009

National Rivers and Streams Assessment EPA Region 7 Field Training Workshop, Kansas City, Kansas,  
2009

Niton XRF Training, Kansas City, Kansas, 2009

ICS-200 Training, Overland Park, Kansas, 2009

CPR and First Aid Certification, Kansas City, Kansas, 2009

**JEFFREY E. PRITCHARD**  
*Senior Environmental Scientist*

**SPECIALTIES**

- CERCLA/OPA/Counter-terrorism Emergency Responses
- Removal Site Evaluations
- CERCLA Site Assessments
- Targeted Brownfields Assessments
- Removal Actions
- Enforcement Support
- Field Screening
- Air Monitoring
- SPCC Plan Review/Inspections

**EDUCATION**

- B.G.S., Environmental Studies, University of Kansas, Lawrence, Kansas

**PROFESSIONAL CERTIFICATIONS**

- Certified Hazardous Materials Manager – Master Level
- NIOSH 582 Certified Microscopist
- AHERA Asbestos Inspector
- Licensed Well Driller Contractor, Missouri and Iowa

**RELEVANT EXPERIENCE**

Mr. Pritchard has over 12 years of experience in emergency response and environmental site assessment and cleanup activities. Mr. Pritchard has been with Seagull Environmental Technologies, Inc., for more than 8 years, where he has served as a staff Environmental Scientist and Project Manager. During his tenure with the company, he has effectively proven his ability to maintain strong customer relationships, efficiently use corporate resources, and successfully manage multi-disciplinary teams, as required to meet contractual and project obligations. He has successfully managed over 85 task orders under the United States Environmental Protection Agency (EPA) Region 7 Superfund Technical Assessment and Response Team (START) contracts (START I, II, and III, from 1999 to present), EPA Region 7 Technical Assistance (TA) contract (from 2001 to 2005), and EPA Mini-START contract (2009 to present). Mr. Pritchard currently serves as the Deputy Readiness Coordinator for the EPA Region 7 START III contract and as the Site Assessment Manager for the EPA Region 7 Mini-START contract. Mr. Pritchard has managed or participated in over 175 site assessments, 65 emergency responses, and 40 removal actions. He has prepared budget estimates; project cost tracking summaries; quality assurance project plans (QAPP); and reports for emergency responses, Removal Site Evaluations (RSE), Pre-Comprehensive Environmental Response, Compensation, and Liability Information System (Pre-CERCLIS) screening assessments, Preliminary Assessments (PA), Site Inspections (SI), Integrated Site Assessments (ISA),

Expanded Site Inspections (ESI), Targeted Brownfields Assessments (TBA), and Spill Prevention, Control, and Countermeasures (SPCC) inspections.

Mr. Pritchard has extensive knowledge and experience with direct-push technology, which he has applied at numerous EPA and private sector projects. Furthermore, Mr. Pritchard has conducted training on direct-push technology to clients. Mr. Pritchard is also a certified asbestos inspector and trained microscopist. The experiences gained from working with various federal, state, and local agencies, along with private sectors, have not only provided Mr. Pritchard with knowledge of relevant and applicable environmental laws, protocols, and standard operating procedures (SOP), but also the skill set associated with community involvement.

Before joining Seagull, Mr. Pritchard was a project manager for the EPA Region 7 START 1 contract from 1999 to 2000. From 1998 to 1999, Mr. Pritchard was the environmental coordinator for a private water utility company, where his duties involved establishing a sampling and analysis program to ensure federal and state compliance for the company's 100-plus water systems.

### **Emergency Response**

Mr. Pritchard has participated in over 65 emergency responses in the last 10 years. For those responses, he has assessed multiple situations that have included: counter-terrorism incidents, natural disasters, explosive chemicals, toxic air releases, oil spills, abandoned containers, tire fires, mercury spills, and illegal chemical storage and distribution activities.

In 2007, Mr. Pritchard responded to chemical plant fires in Kansas City, Missouri, and Des Moines, Iowa. Mr. Pritchard coordinated response activities with state and federal emergency responders. Response activities included the collection of real-time air quality data and multi-media samples. Sample results were used to evaluate contaminant exposure levels and the necessity for follow up cleanup activities.

In 2002, Mr. Pritchard responded to a tire fire in Nebraska City, Nebraska, where four grain silos containing recycled rubber tires had caught fire and exploded. During the two-week response, Mr. Pritchard was responsible for documenting site conditions, conducting air sampling and real-time air monitoring, and coordinating the containment, sampling, and disposal of oil and wastewater generated from the ongoing fire-fighting efforts. In addition, Mr. Pritchard corresponded with regulatory authorities from the State of Nebraska and the United States Army Corps of Engineers to ensure compliance with all applicable laws and regulations.

In 2001, he responded to a recycling facility in Macy, Nebraska, where 200 drums and containers had been abandoned. Mr. Pritchard conducted an entry in Level B personal protective equipment (PPE) to inventory and sample the abandoned containers. He performed hazard classification field screening, determined appropriate waste streams, and collected additional samples for waste disposal profiling. The data generated from the response was used to assist EPA and local officials with coordinating proper disposal of the containers.

At the Creighton Chemical site, Mr. Pritchard led emergency response activities to assess numerous containers of degraded cyanide and other poisons formerly used for wildlife and pest control. Mr. Pritchard conducted sampling activities in Level B PPE, air monitoring, field screening of materials using a HazMat ID portable Fourier Transform Infrared (FTIR) spectrometer, and packaging of segregated waste streams for proper disposal.

In 2004, Mr. Pritchard conducted emergency response activities at the Omaha Fireworks site, where 200 pounds of explosive materials were discovered. Mr. Pritchard assisted authorities from EPA; the Bureau of Alcohol, Tobacco, and Firearms (ATF); and the Omaha Sheriff's Department with identifying and segregating compatible chemicals and materials for safe transport and cost-effective disposal.

Since 2000, Mr. Pritchard has responded to more than 30 spills of elemental mercury. Those spills have occurred at residences, schools, hospitals, and commercial businesses. At those sites, Mr. Pritchard performed real-time air monitoring and air sampling to confirm cleanup goals had been achieved, and conducted oversight of cleanup activities to ensure the proper removal of mercury-contaminated materials.

## **Site Assessments**

### CERCLA Site Assessments and Removal Site Evaluations

Mr. Pritchard has participated in a wide variety of site assessment activities that have involved the following types of contaminants: fumigants, solvents, wood treatment byproducts, chemical warfare agents, metals, pesticides, herbicides, perchlorate, and wastes derived from Former Manufactured Gas Plants (FMGP).

Mr. Pritchard has managed on-going site assessment activities at the West Highway 6 and Highway 281 site in Hastings, Nebraska. Mr. Pritchard manages a project team that collects quarterly groundwater samples from a network of 30 monitoring wells and monthly collection of samples from the site's soil vapor extraction (SVE) system and groundwater treatment system. Sample data is compiled and evaluated to determine the need for additional assessment work.

Mr. Pritchard managed site assessment, demolition, and removal of entire city blocks (including existing buildings and structures) as part of the City of Kansas City, Missouri, KC Live Project. Management responsibilities included assessment of environmental media, quantification of contamination as well as the coordination of demolition activities and proper disposal of contaminated subsurface soils/media. In addition, on-site project management duties involved oversight of the complete interior gutting and asbestos/mold abatement of a historic downtown theater for future renovation.

Mr. Pritchard managed removal reassessment activities at the Ogallala Groundwater OU2 site. Mr. Pritchard led site activities to reassess a potential source area, which involved the collection of subsurface soil samples to delineate the vertical and horizontal extent of tetrachloroethene-contaminated soil. Analytical results were incorporated into a remedial evaluation report to assist with determining future cleanup activities.

In 2002, Mr. Pritchard led a project team that assessed more than 100 former wood treatment facilities in Missouri. The team evaluated historical information to identify the former sites. Once identified, field team members conducted site visits where information was collected to document current site conditions and potential contamination of environmental media.

Mr. Pritchard managed the Clarke County Pesticide site, where over 250 containers of banned pesticides and herbicides were suspected to have been buried. He conducted sampling of soil, surface water, and groundwater, and coordinated a geotechnical survey to locate the buried materials.

Mr. Pritchard has conducted PA/SIs at numerous Formerly Used Defense Sites (FUDS) in EPA Region 7, including Schilling Atlas sites, Forbes Atlas sites, Lincoln Atlas sites, Garden City Army Airfield, and Ainsworth Army Airfield. At those sites, he managed field teams that collected thousands of multi-media samples (soil, groundwater, surface water, sediment, and air) to provide data necessary for Hazard Ranking System (HRS) scoring.

At the Albert City SBA site in Albert City, Iowa, Mr. Pritchard led field activities that involved sampling drinking water wells, monitoring wells, storm sewers, soil, and indoor air for volatile organic compounds (VOC). The data were incorporated into a RSE report to assist EPA with evaluating the need for further Superfund response at the site.

At numerous START sites across EPA Region 7, Mr. Pritchard has conducted sampling of ambient air, indoor air, and soil gas to evaluate potential threats to human health from vapor intrusion via contaminated soil and groundwater.

#### Targeted Brownfields Assessments

Under the EPA Region 7 START, TA, and Mini-START contracts, Mr. Pritchard has managed or participated in over 30 TBAs (including Phase I and Phase II Environmental Site Assessments [ESA] and Brownfields Inventory Assessments), including the Lakeside Salvage site, American Recycling site, Bonne Terre Mining site, and Waterloo Dry Cleaner site. In 2004, Mr. Pritchard managed a TBA at the Springfield FMGP site, where multi-media samples were collected to assess contamination associated with the former FMGP, which operated at three separate locations. The site involved coordination with federal, state, and local officials, as well as private entities.

#### **Removal Actions**

Mr. Pritchard was the project manager at the Prime Western Smelter site in Gas, Kansas, where 100,000 cubic yards of lead-contaminated soil was removed. Mr. Pritchard led a field team that characterized the 100-acre site for lead-contaminated soil using a Niton x-ray fluorescence (XRF) spectrometer. During the removal activities, Mr. Pritchard coordinated excavation activities, conducted air sampling to ensure the public was not exposed to fugitive releases of lead-contaminated dust, and verified the achievement of cleanup goals following excavation.

In Omaha, Nebraska, Mr. Pritchard managed the Former Lorenz Chemical site, which included a RSE and subsequent removal action. During the RSE, Mr. Pritchard utilized direct-push technology to delineate the vertical and horizontal extent of contaminated soil. Based on those results, 4,000 tons of pesticide-contaminated soil was excavated during a subsequent removal action. During the removal activities, he operated six high-volume PS-1 air samplers around the site perimeter to assess threats to human health and the environment posed by the removal activities. In addition, Mr. Pritchard monitored the work of site contractors to ensure cost effectiveness, timeliness, and compliance with contract specifications.

In Carthage, Missouri, he managed the Show Me Chrome site, where 3,000 gallons of plating-related wastes were removed for proper disposal. Mr. Pritchard characterized the plating wastes and conducted oversight on the safe and proper removal of the wastes for transfer to a disposal facility.

At the lead-contaminated Lohman Property site in Peoria, Kansas, he compiled subsurface sampling data based on Niton XRF screening for lead in soils. The data were used to plan for the removal of 1,000 tons of lead-contaminated soil from the site.

Mr. Pritchard managed the Ava Chlordane site, where chlordane had been sprayed in an occupied duplex residence. He collected air and dust/wipe samples from the residence to evaluate threats posed to the residents. Sampling data were also utilized to assist EPA with establishing cleanup levels. Removal activities involved a complete interior cleaning and encapsulation of the residence, followed by air sampling to confirm achievement of the cleanup levels.

Mr. Pritchard managed the removal of mercury-contaminated material from several residences in Missouri Valley, Iowa, where over 10 pounds of elemental mercury had been spilled. His responsibilities included documentation of the cleanup activities, which involved the removal of carpet, flooring, wood decking, concrete, and personal items. In addition, Mr. Pritchard collected samples of the waste streams for evaluating disposal options.

## **Preparedness and Prevention**

### Homeland Security

Mr. Pritchard has been trained on numerous issues associated with large-scale Homeland Security-related incidents, including counter-terrorism. He has received extensive training for response to incidents involving nuclear, biological, and chemical warfare agents. In addition, Mr. Pritchard has received advanced-level training on the Incident Command System (ICS).

Mr. Pritchard has been a participant in several EPA-sponsored exercises involving emergency responses to chemical, biological, and radiological incidents. In 2004, at the large-scale EPA Region 7 exercise entitled "Ruby Slippers", Mr. Pritchard was a hazardous materials expert on a field team comprised of EPA radiation personnel. He was tasked to identify hazardous materials, particularly those presenting a radiation threat, which could endanger human health and the environment. Mr. Pritchard utilized real-time air monitoring equipment and a personal data assistant (PDA) to record air monitoring results and transfer the information to the Command Post to enable rapid display of the data.

Mr. Pritchard was a member of the exercise development team that created and implemented a 3-day exercise to evaluate the state of Missouri's response capabilities to a catastrophic earthquake. Mr. Pritchard developed exercise documents including player handbooks and the exercise plan. In addition, Mr. Pritchard served as a controller/evaluator for the functional exercise. Lessons and insight gathered from the exercise were compiled in an after action report to be used to facilitate change/improvement in the state's response strategies/capabilities.

## **Other Technical Support**

### Federal Disaster Support

In 2008, Mr. Pritchard managed START field teams that responded to large-scale natural disasters in Iowa. START assistance was provided to EPA at the Parkersburg Tornado site and the Iowa Flooding Event. In particular, Mr. Pritchard managed START field teams that conducted daily air sampling and monitoring for asbestos and particulates in six Iowa cities that were impacted by the natural disasters.

In 2007, Mr. Pritchard led EPA Region 7 START contractors in response to an EF-5 tornado that destroyed Greensburg, Kansas. Mr. Pritchard led a multi-disciplinary team of emergency responders and technical support personnel that provided services to local, state, and federal entities. Initial response activities included, but were not limited to, conducting air monitoring throughout the City and providing technical assistance and oversight during the response to releases and potential releases of hazardous materials. In response to the tornado-related damage and the recovery assistance required, FEMA tasked EPA with an ESF-10 mission assignment. Mr. Pritchard managed the ESF-10 mission assignment activities that addressed recovery and proper handling/disposal of HHW and white goods, assessment and removal of PCB-contaminated media related to tornado-damaged electrical transformers (including characterization of damaged transformers), and collection of multi-media samples (as needed) to ensure protection of human health and the environment. Specific ESF-10 site activities included collection of soil samples from staging and disposal areas prior to their use for cleanup activities to determine baseline concentrations; real-time air monitoring for particulates and other contaminants; air sampling for site-related contaminants (asbestos, metals, and PAHs); and collection of bulk samples from structural and demolition debris for asbestos analysis to determine safe demolition techniques. Additional ESF-10 activities included an assessment of the City's power grid to identify and characterize transformer oil spills at areas potentially contaminated with PCBs, excavation of PCB-contaminated soil associated with those spills, and characterization of the recovered transformers to determine disposal/recycling options.

In 2006, Mr. Pritchard supported EPA Region 4 in the response to Hurricane Katrina. In the hurricane-devastated areas of coastal Mississippi, Mr. Pritchard conducted reconnaissance of flooded areas for hazardous materials. He identified "orphan" containers of hazardous materials and monitored retrieval of the materials to central staging areas for characterization.

### Spill Prevention, Control, and Countermeasure Inspections

Mr. Pritchard was the project manager for START field teams that assisted EPA in conducting SPCC inspections of facilities and plans. His responsibilities were to correspond with EPA to determine the level of effort needed to complete the required inspections over a short time period, coordinate field teams, provide equipment and supplies necessary to fulfill inspection requirements, and complete post-inspection reports.

### Air Quality Studies

Mr. Pritchard has conducted ambient air monitoring and sampling at numerous hazardous waste sites involved with removal activities and site assessment investigations. For the Region 7 START contract, Mr. Pritchard has been responsible for the maintenance and calibration of PS-1 high-volume samplers and low-

volume personal sampling pumps. In addition, Mr. Pritchard has developed air monitoring and sampling work plans and trained START members on proper procedures for conducting air quality investigations.

## **EMPLOYMENT HISTORY**

Seagull Environmental Technologies, Inc., Overland Park, Kansas, Environmental Scientist, 2001 to Present.

Ecology and Environment, Inc., Overland Park, Kansas, Environmental Scientist, 1999 to 2001.

U.S. Utilities, Inc., Valdosta, Georgia and Columbia, South Carolina, Environmental Coordinator, 1998 to 1999.

Environmental Specialist, Douglas, Georgia, Environmental Scientist, 1997 to 1998.

## **TRAINING**

40-Hour Hazardous Waste Operations Training, Buffalo, New York, 1999

8-Hour Refresher Training, Overland Park, Kansas, Annually from 1999 to Present

Regional Hazardous Material Transportation (DOT), Buffalo, New York, 1999

Incident Command Level Training for Nuclear, Biological, and Chemical Emergency Responder, Kansas City, Kansas, 2001

EPA Advance Radiation Response Training, Kansas City, Kansas, 2004

SCBA Operation and Maintenance Training, Lenexa, Kansas, 2002

ER/CT Response Training, Lenexa, Kansas, 2004

Field Documentation Training, Lenexa, Kansas, 2004

Niton Spectrometer Analyzer Radiation Safety Training, Kansas City, Kansas, 2004

Field Screening Technologies, Lenexa, Kansas, 2004

Level A Personal Protective Equipment Response, Lenexa, Kansas, 2001

Clandestine Methamphetamine Laboratory Response Training, Ames, Iowa, 2001

Confined Space Entry and Rescue Training Course, Lenexa, Kansas, 2001

Freshwater Oil Spill Symposium, New Orleans, Louisiana, 2004

SENSIR HazMatID, Overland Park, Kansas, 2004

Air Monitoring for Hazardous Materials, Ft. Leavenworth, Kansas, 2003

Incident Command System, Basic I-200 for Federal Disaster Workers, Lenexa, Kansas, 2004

Incident Command System, I-300, Duluth, Georgia, 2005

Scribe Database Training, Lenexa, Kansas, 2004

Hazard Ranking System Training, Kansas City, Kansas, 2005

NIOSH 582 Microscopy, Lawrence, Kansas, 2006

AHERA Asbestos Inspector Training, Lawrence, Kansas, 2006

Incident Command System, I-400, Kansas City, Missouri, 2008
