Public Works/Utilities - Watershed Management

0054 Floodplain/Floodprone Area Engineering/Projects

Description:

This project provides funding for floodplain management projects including the purchase of easements or fee title for floodplain/floodprone areas to conserve flood storage and other floodplain functions. Also provides funding for preliminary engineering, construction, potential land acquisitions and other measures related to flood reduction projects along Salt Creek and other water ways.

LPSNRD assists in the funding of these projects. These projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Specific locations have not yet been identified.

0057 Stream Rehabilitation on Parks Property

Description:

This project is for storm drainage projects on Parks and Recreation Department property, that are typically channel rehabilitation, scour protection, and/or water quality projects. Projects typically include grade stabilization, composite revetments, re-vegetation, modular walls, plunge pools, and similar stream stability practices in these and other parks.

Projects are closely coordinated with the Parks and Recreation Department. Projects are funded by general obligation bonds, which must be approved by City of Lincoln voters. A project in Irvingdale Park is proposed to be funded in the 2015 bond issue. A project in Rudge Park is proposed to be funded in the 2017 bond issue, and a project in Trendwood Park is proposed to be funded in the 2019 bond issue.

0063 Water Quality Projects

Description:

SUST CAT1 - Water Quality projects are Best Management Practice (BMP) Projects that improve or manage water quality and quantity. Projects include cooperative projects with Parking, Parks, DEQ, developers, and others.

LPSNRD assists in the funding of this project. The City of Lincoln continues to seek funding from NDEQ and other state and federal agencies for assistance with water quality projects. The City share of these projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Specific locations have not been identified.

0064 Urban Storm Drainage Projects

Description:

Urban drainage design and/or construction projects are projects at various urban locations where no system exists or to replace or improve deficient open and closed drainage systems. It also includes funding for preliminary engineering, easements and right-of-way. Many of the areas being targeted are those identified in the Preliminary Engineering and Prioritization of Urban Drainage System Deficiencies studies funded in previous CIPs. The prioritization of these deficiencies is the basis for those targeted projects identified with this project. Miscellaneous repairs and rehabilitations are typically projects to address areas of deficiencies or repairs identified by the Maintenance Division and others, as well as for storm drainage projects required in conjunction with the construction of City paving or other projects throughout the city.

Projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0714 Street Drainage Projects

Description:

Street drainage design and/or construction projects are projects at various urban locations to pay for the urban drainage and/or water quality portion of street projects. It also includes funding for preliminary engineering, easements and right-of-way as necessary. These projects and their specific locations are coordinated with the Engineering Services Division of Public Works based on their Capital Improvement Projects.

Projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0061 Comprehensive Watershed Master Plans

Description:

This project is for Preliminary engineering for Watershed Master Plans such as the North Salt Creek Master Plan, the Comprehensive City-Wide Master Plan and Urban Drainage Deficiency Studies. These plans are a tool to identify capital projects, manage drainage quantity and quality, meet Clean Water Act requirements, update floodplain maps, and prioritize future stormwater expenditures in drainage basins within the City and surrounding area.

LPSNRD may assist in providing funds for this project. These plans or studies are funded by general obligation bonds, which must be approved by voters of the City of Lincoln.

0062 Implementation of Watershed MasterPlan Projects

Description:

Projects to implement Watershed Master Plans, Basin Management Plans and Conservation Plans to include channel improvements, basin stability measures, water quality features, conservation practices, engineering, land acquisitions and easements, FEMA map updates, floodplain preservation, grade checks, storage facilities, flood reduction projects and other identified projects.

LPSNRD assists in the funding of these projects. These projects are funded by general obligation bonds, which must be approved by voters of the City of Lincoln. Projects to be implemented are included in the following Plans:

- a) Haines Branch Watershed Management Plan and Conservation Plan
- b) Beal Slough Watershed Master Plan
- c) Southeast Upper Salt Creek Watershed Master Plan
- d) Stevens Creek Watershed Master Plan
- e) Cardwell Branch Watershed Master Plan
- f) Deadmans Run Watershed Master Plan
- g) Little Salt Creek Watershed Master Plan and Conservation Plan
- h) Antelope Creek Watershed Basin Master Plan
- i) South Salt Creek Watershed Management Plans
- j) North Salt Creek Watershed Management Plans
