

**PUBLIC WORKS AND
UTILITIES DEPARTMENT**

**City of Lincoln
Wetland Bank
Request for Use**

To: Devin Biesecker, Wetland Bank Manager

Date:

This is an initial request for use of the City of Lincoln Wetland Mitigation Bank as a site for mitigation for a project requiring authorization under Section 404 of the Clean Water Act due to unavoidable impacts to Waters of the United States. It has been determined through evaluation of this project that on-site mitigation is not practicable. Our division will reimburse Engineering Services for use of the wetland bank at a cost of \$5,617 per wetland credit required. It is understood that the Army Corps of Engineers has the authority to deny a request for use of the City's Wetland Bank and set mitigation ratios for the number of impacted acres. Following approval of the 404 permit and use of the City's wetland mitigation bank by the COE, the Approved Credits and Reimbursement form will be submitted showing the final number of credits to be used, and reimbursement will be made to CIP Project No. 700817.
