

# Flashing Yellow Arrows

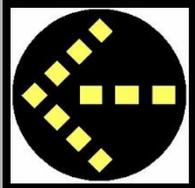

## Solid red arrow:

Drivers intending to turn left must stop and wait. They should not enter an intersection to turn when a solid red arrow is being displayed

## Solid yellow arrow:

The left-turn signal is about to change to red and drivers should prepare to stop or prepare to complete a left turn if they are legally within the intersection and there is no conflicting traffic present.

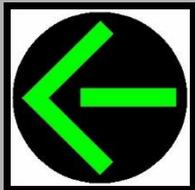

## Flashing yellow arrow:

Drivers are allowed to turn left after yielding to all oncoming traffic and to any pedestrians in the crosswalk.

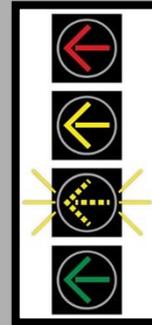

**Oncoming traffic has a green light.**

Drivers must wait for a safe gap in oncoming traffic before turning.

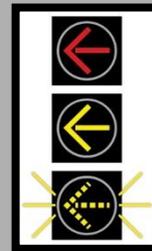

## Solid green arrow:

Left turns have the right of way. Oncoming traffic and conflicting pedestrians have a red light.

4-Section

Typical  
3-Section

## Flashing yellow arrow benefits

A flashing yellow arrow signal has the same meaning it always has: left turns may proceed with caution after yielding to oncoming traffic.

Use of the flashing yellow arrow has been shown to have several benefits including minimizing delays and enhancing safety by reducing driver errors. Flashing yellow arrow signals have been approved for widespread use by the Federal Highway Administration.
