

**Do you have problems with flooding or drainage?
If so, let the City know about your drainage issues!**

As part of the City's Urban Drainage Preliminary Engineering Study, we are looking for your assistance in identifying problem areas with the City's drainage system. This information will help us determine our needs and set priorities for future public stormwater improvement projects.

Complete the survey at
www.SurveyMonkey.com/s/LincolnFlooding
or contact Ben Higgins at the Watershed Management
Division of the Public Works and Utilities Department:

402-441-7589 or bhiggins@lincoln.ne.gov

The City of Lincoln typically pays for stormwater improvement projects through bond issues, and the most recent one passed in 2012. The funds are used for projects to control flooding, upgrade the storm drain system, improve water quality and rehabilitate waterways. You'll find a list of the latest projects at lincoln.ne.gov (keyword: watershed).

As part of our Urban Drainage Preliminary Engineering Study, we are looking at the public storm drainage networks across the City to identify drainage and flooding problems. If you've experienced flooding or drainage issues, letting us know is the first step toward potentially resolving the issue.
