Lincoln City Council Members  
575 S. 10th Street  
Lincoln, NE 68510

Subject: West "A" Street Storm Water Improvement

We have an opportunity to correct a long time drainage problem and save the city some money. If we do the project now when the street is being improved it will save \$100's of thousands of tax dollars and we won't have to do it later. Let's not tear up the street twice. That is short sighted and expensive.

The West A Street improvement plan is being finalized and we were surprised to find out at the last update meeting that the plans now don't include extending the storm water sewer system 350' west to take in storm water from the shopping center, W. Washington, the car wash, and street drainage. The plan at one time included extending the storm sewer from SW17th west to the shopping center and a storm water pipe from the end of West Washington to West A street to correct a the drainage problem.

This small project needs to be added to the plans for West A improvements to avoid flooded cars, flooded basements, impassable streets, and just improve the quality of life in the area. Lets not be short sighted in doing all possible construction now to avoid doing it twice.

Thank you in advance for your attention to matter.

Respectfully,

Larry Geiger
