

Your time matters

Get started with electronic prescribing!

R_x Together we can provide the best service to your patients. Use your electronic medical record (EMR) system to order medicines from our network pharmacies. Electronic prescribing (e-prescribing) can reduce your work and allow us to fill your patients' medicines accurately and faster.

E-prescribe to Aetna Specialty Pharmacy®

E-prescribing allows you to send prescriptions right through your existing EMR. E-prescribing offers many advantages, such as:

- 1. Less work for your office.** With e-prescribing you won't have to worry about lost scripts. It also speeds up refill renewals and reduces calls to your office with questions about prescriptions.
- 2. Clinical decision support.** It allows you to choose from multiple strengths and forms, prompting you to fill out the dose, route, strength and frequency.
- 3. Errors prevention.** It reduces issues, like when handwriting or images are hard to read.

As a result, e-prescribing improves patient medication adherence, leading to fewer complications, reduced risk of readmissions and more effective management of your patients' treatment plan. And there's nothing your patient needs to do. We'll set up their profile directly from your EMR.

How to add Aetna Specialty Pharmacy to your EMR

Add Aetna Specialty Pharmacy's profile in your EMR using the following information:

Aetna Specialty Pharmacy
