

Information #2 submitted by Cindy Chapman

I encourage all to view this information before we meet to discuss noise and setbacks. Mr. Shindeldecker's experience is proof that placing turbines in close proximity to residences does cause problems.

The Vestas Wind Systems safety manual clearly states to stay at least 1300 feet away. We should not be creating a minimum setback that is less than what the manufacturers require for their employees.

The Vestas Manual is provided as a separate attachment labeled "Vestas Mechanical Operating and Maintenance Manual"
