

# G INTEGRATING TRAVEL MODES

## BACKGROUND:

- 48th Street serves multiple modes of travel including cars, bicycling, walking and transit
- There is a need to strike a balance between the needs of each mode
- Amenities for each mode should be considered
- Both public and private efforts are needed to accomplish a quality streetscape along 48th Street that best serves all users
- Streetscaping efforts have been and are being tried in other areas of the City including South Street
