10th and Salt Creek Bridge

Project No. LCLC-5215(3), Control No. 13233, City No. 540027

August 21, 2014 – 4:00 pm to 6:00 pm

Indian Center Inc. – 1100 Military Road, Lincoln, NE 68508

Project Description

The project consists of constructing a new bridge on North 10th Street over Salt Creek. Construction of the new bridge would require reconstruction of the North 10th Street and Military Road intersection, a temporary detour of the Haymarket Ballpark Trail, and vehicular detours due to road closures. Funding for the project is being provided from both local and federal sources.

Purpose

The purpose of the project is to provide a structurally, functionally and hydraulically sufficient crossing over Salt Creek along North 10th Street, improve the mobility of the traveling public, and connect local communities. The existing bridge is located approximately 350 feet north of Military Road and approximately 250 feet south of the intersection of North 10th Street and Sun Valley Boulevard (US Hwy 6).

Need

Replacement of the existing North 10th Street bridge over Salt Creek is needed to address deficiencies in the existing bridge structure. The existing bridge has material deterioration on multiple bridge components, but is currently safe to drive upon. The existing bridge provides a connection between the Belmont and North Bottoms neighborhoods which are located on opposite sides of Salt Creek, and provides access to the University of Nebraska campus and downtown Lincoln from locations north of Salt Creek.

Project Schedule

The 10th and Salt Creek Bridge project is scheduled for construction to begin in early 2016. Preliminary Design and Environmental Analysis are currently underway. Construction is expected to be completed within one calendar year.

Project Sponsors

- Federal Highway Administration
- Nebraska Department of Roads
- City of Lincoln

U.S. Department of Transportation
Federal Highway Administration

The proposed project would include (1) the replacement of the North 10th Street Bridge over Salt Creek, (2) improvements to the North 10th Street and Military Road intersection needed to meet the proposed bridge grade, and (3) a Haymarket Ballpark Trail connector. The Haymarket Ballpark Trail would be temporarily impacted due to construction of the bridge. The trail would be reconstructed as part of the proposed project.
