

# OPEN HOUSE

## 49TH & RENTWORTH STREETS Storm Drain Improvements Project

The City of Lincoln and Alfred Benesch & Company will host an open house to educate citizens and gather input regarding planned storm sewer improvements near South 48th Street and Rentworth Drive.

### DATE • TIME • LOCATION

Wednesday, August 28, 2012

5:00 to 6:30 p.m.

Old Cheney Alliance Church  
(located at 5201 Old Cheney Road)

This project includes the installation of additional storm sewer pipe and inlets. These additions will improve drainage by allowing more water to be removed from the street. As a result, storm water will get to the storm sewer quicker, reducing ponding and street flooding.

**The construction process will be phased so that traffic can be maintained and disruptions to business operations can be minimized.** Some permanent and temporary construction easements will be acquired. The design for this project will be completed in late summer 2013. It will be bid during the winter months and construction is set to begin in spring 2014. Construction is expected to take eight weeks.

**This open house will provide an opportunity for the planning team to share and obtain information from citizens regarding these improvements.** At the open house, attendees may informally view maps and planning documents. Attendees will have an opportunity to discuss their questions and concerns with the project team and are invited to offer their comments regarding the improvements.

### CONTACTS

**Ed Kouma**
