## **Instructions for Filling Out The Application**

- 1) If your application is for temporary or service that requires utility work please complete the utility information at the bottom of the application. If there is no utility work required you do not need to complete that section.
- 2) Applications for temporary services and their associated branch circuits or feeders must be submitted as a separate application.
- 3) The minimum permit fee is \$35. For permit applications that only contain branch circuits and / or feeders the minimum fee shall include the first two of the total number of circuits and / or feeders being installed or altered.
- 4) Total number of branch circuits shall be dertermined according to the overcurrent device. For example, a two or three pole breakder shall be counted as one brance circuit or feeder. Please remember to include all extension and modification to existing circuits in your total number.
