

- At least 5% of population is 75+ years in 1980.
- At least 5% of population is 75+ years in 2021.
- At least 5% in 1980 and 2021.
- Excluded
- 2023 City Limits

## Older Adults (75+ years) 1980 and 2021

‘Baby Boomers,’ or those born between 1946 and 1964, began turning 75 in 2021 and this aging trend will certainly impact Lincoln’s future. It is projected that those age 75 and older will exceed those age 0-5 by 2025 for the first time in history, and comprise 1 in every 10 residents by 2050. This map offers a picture of how an aging population will undoubtedly influence Lincoln’s housing, workforce, health, transportation, and senior service infrastructure and systems.
